Booster Dose Updates

October vaccine updates

Vaccines and Related Biological Products Advisory Committee (VRBPAC):

- October 14th:
Moderna Booster
- October 15th:
J and J Booster
Mix and Match
- October 26th:
EUA for 5-11 year-olds

OCTOBER						2021
MON	TUE	WED	THU	FRI	SAT	SUN
27	28	29	30	1	2	3
4	5	6	7	8	9	10
11	12	13	14	15	16	17
18	19	20	21	22	23	24
25	26	27	28	29	30	31

Pfizer for children ages 5 - 11

- Per press release:
 - Pfizer submitted trial data to FDA on September 28th
 - 2,268 participants 5-11 years of age
 - Vaccine safe and effective in children
 - Likely to start late October, early November
- Actual trial data not available yet
- We are expecting longer refrigerator storage time and smaller number of vials per order

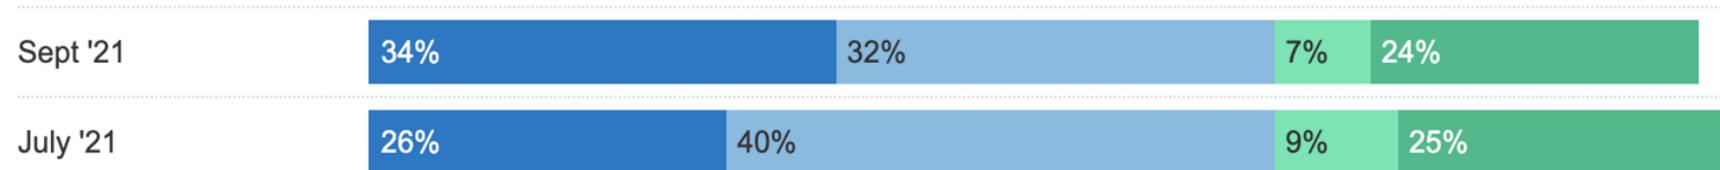

Willingness of parents to vaccinate their children

A Third Of Parents Of 5 To 11 Year Olds Say They Will Vaccinate Their Child Right Away Once A Vaccine Is Available For Their Age Group

Thinking about your...once there is a COVID-19 vaccine authorized and available for your child's age group, do you think you will get them vaccinated...?

■ Right away ■ Wait and see ■ Only if required ■ Definitely not

Child ages 5-11

Child under 5 years old

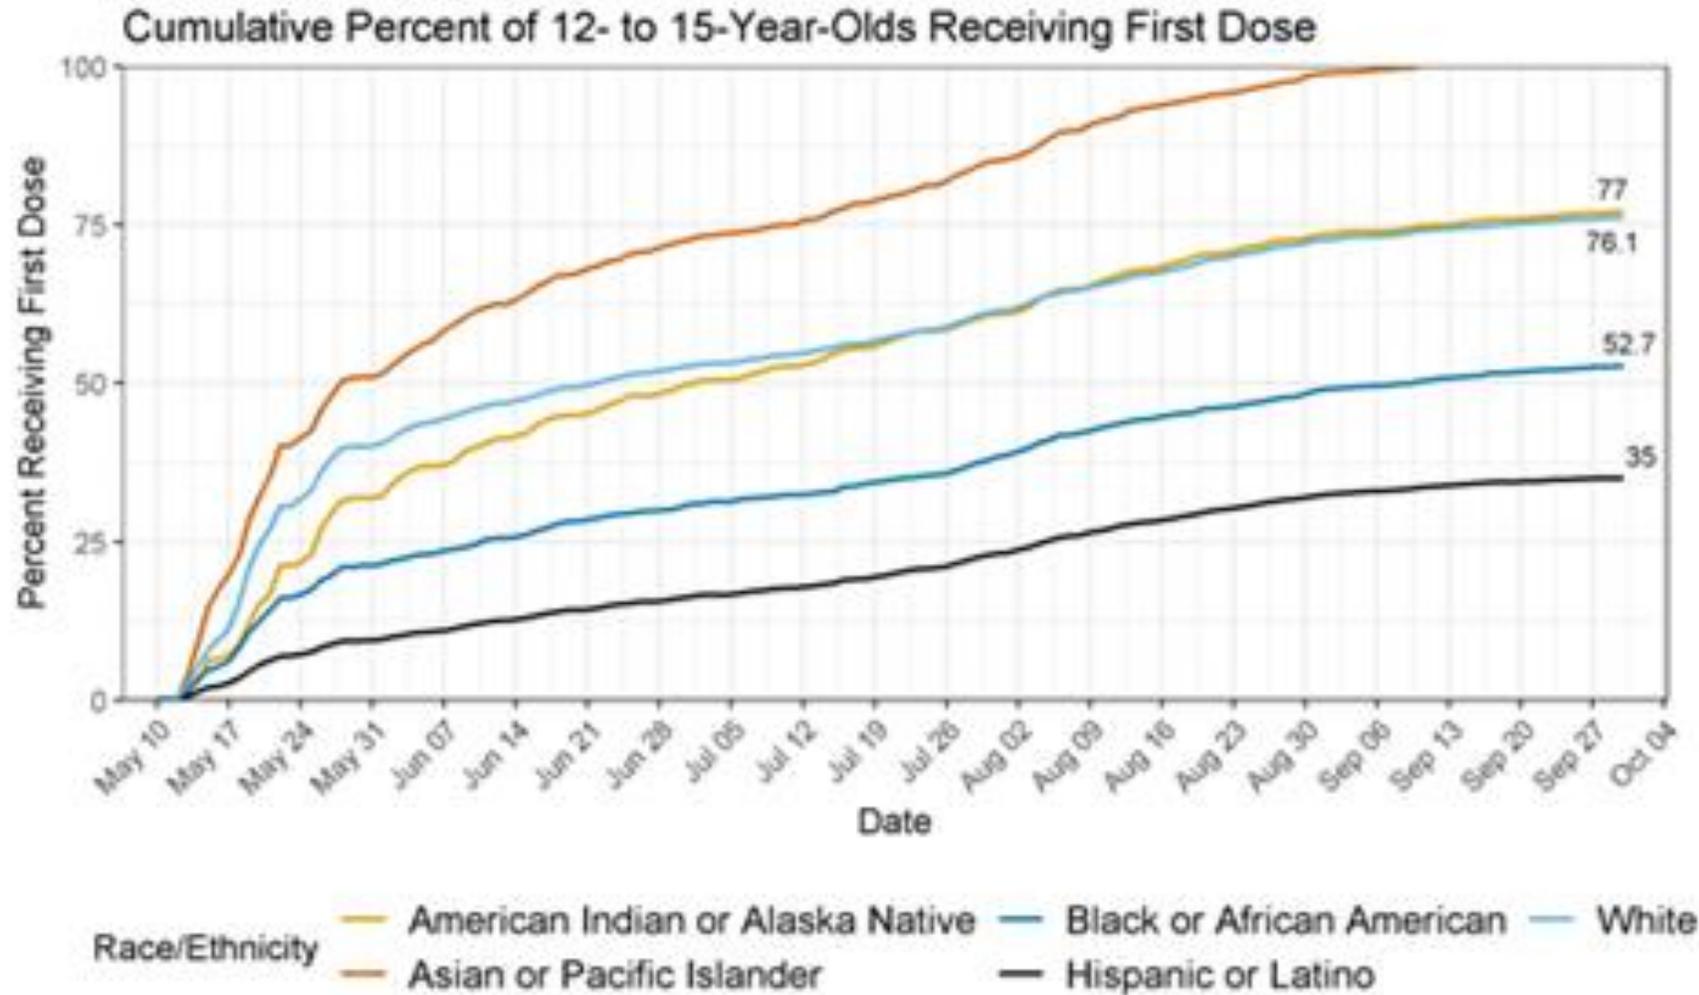

NOTE: Among parents or guardians of children ages 5-11 and parents or guardians of children under 5. See topline for full question wording.

SOURCE: KFF COVID-19 Vaccine Monitor (Parents and the Pandemic Jul. 15-Aug. 2, 2021 and September 13-22 2021) • [Download](#)

[KFF COVID-19 Vaccine Monitor](#)

Unvaccinated children still at risk

Booster dose eligibility

Eligible Groups who SHOULD Get Vaccine

People 65+

Residents in Long Term Care Facilities

50-64 years old with underlying medical conditions

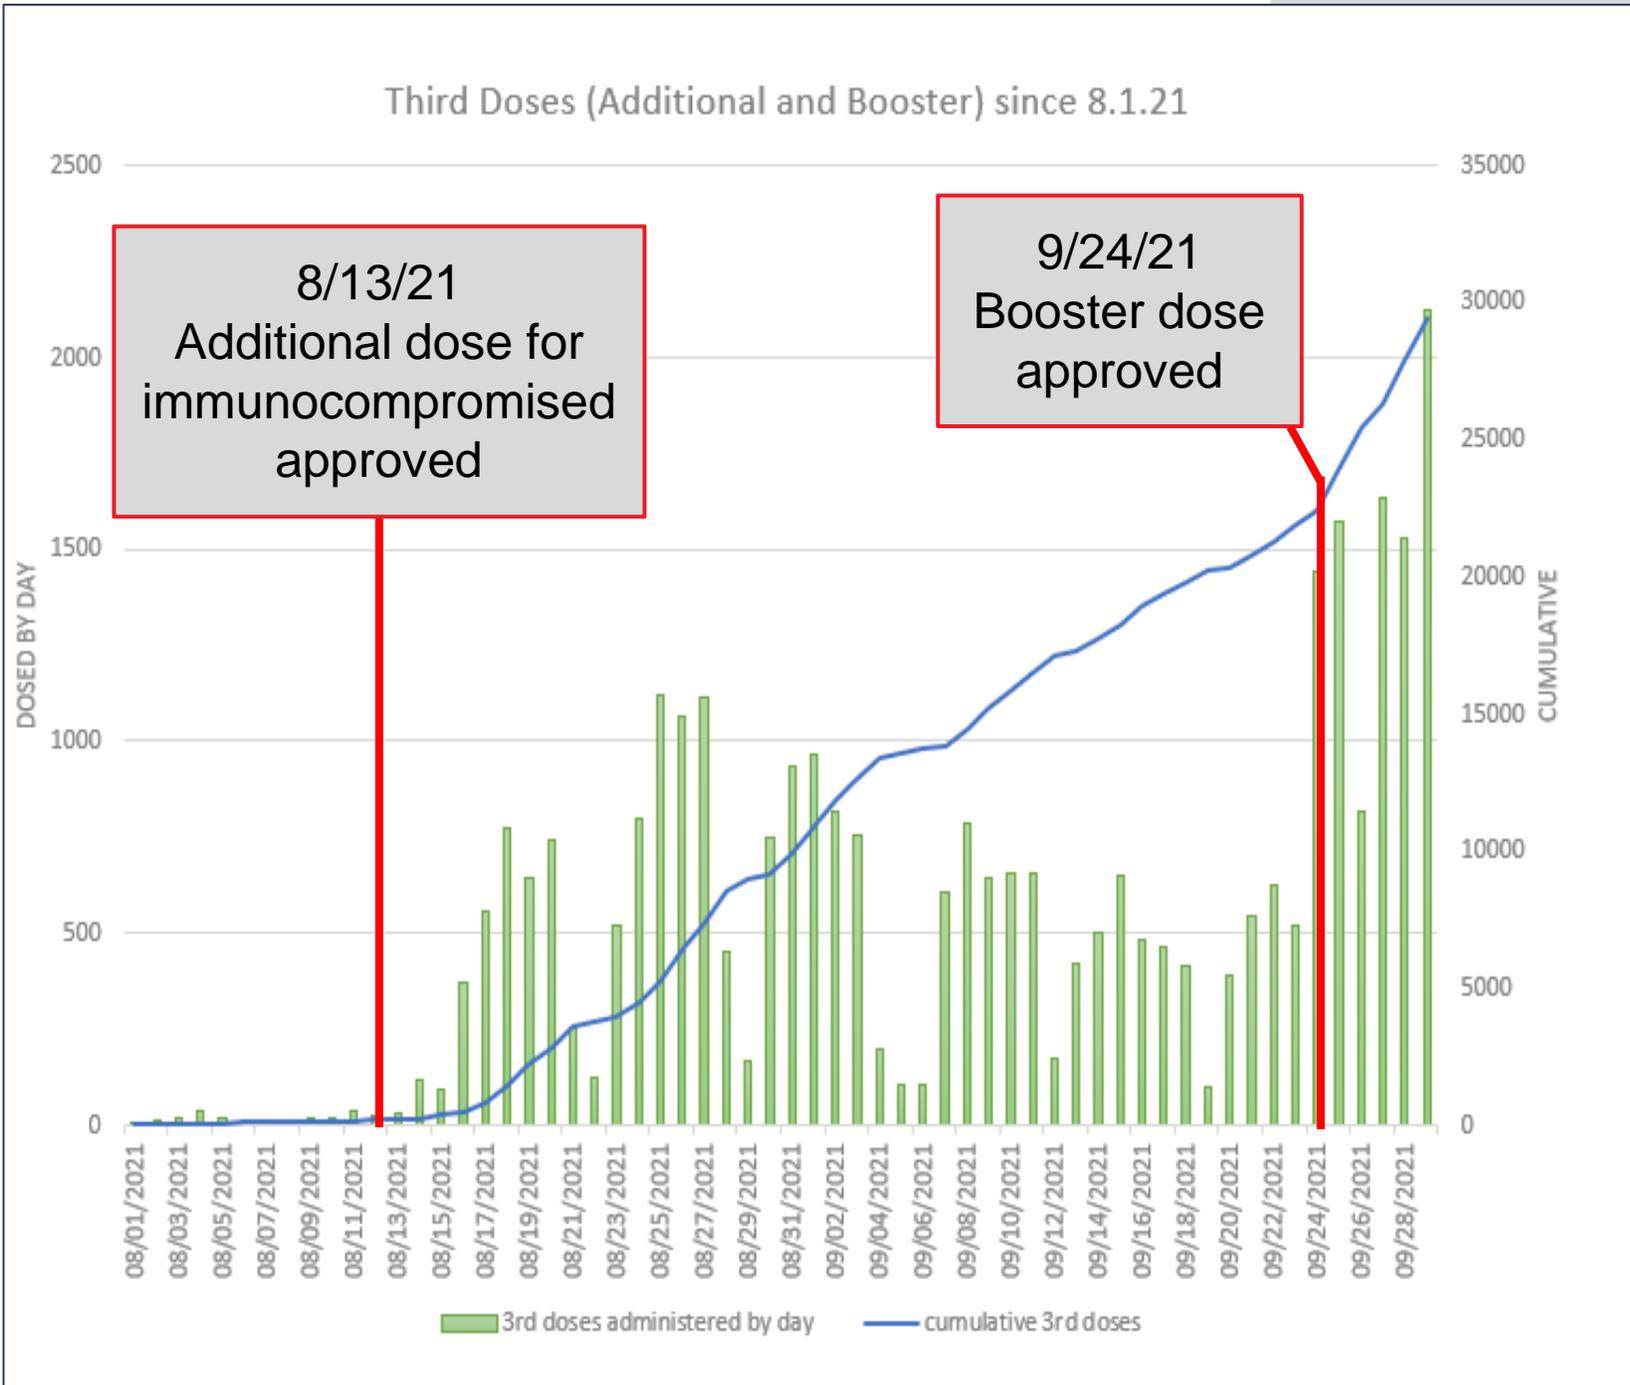

Eligible Groups who MAY Get Vaccine

18-49 years old with underlying medical conditions

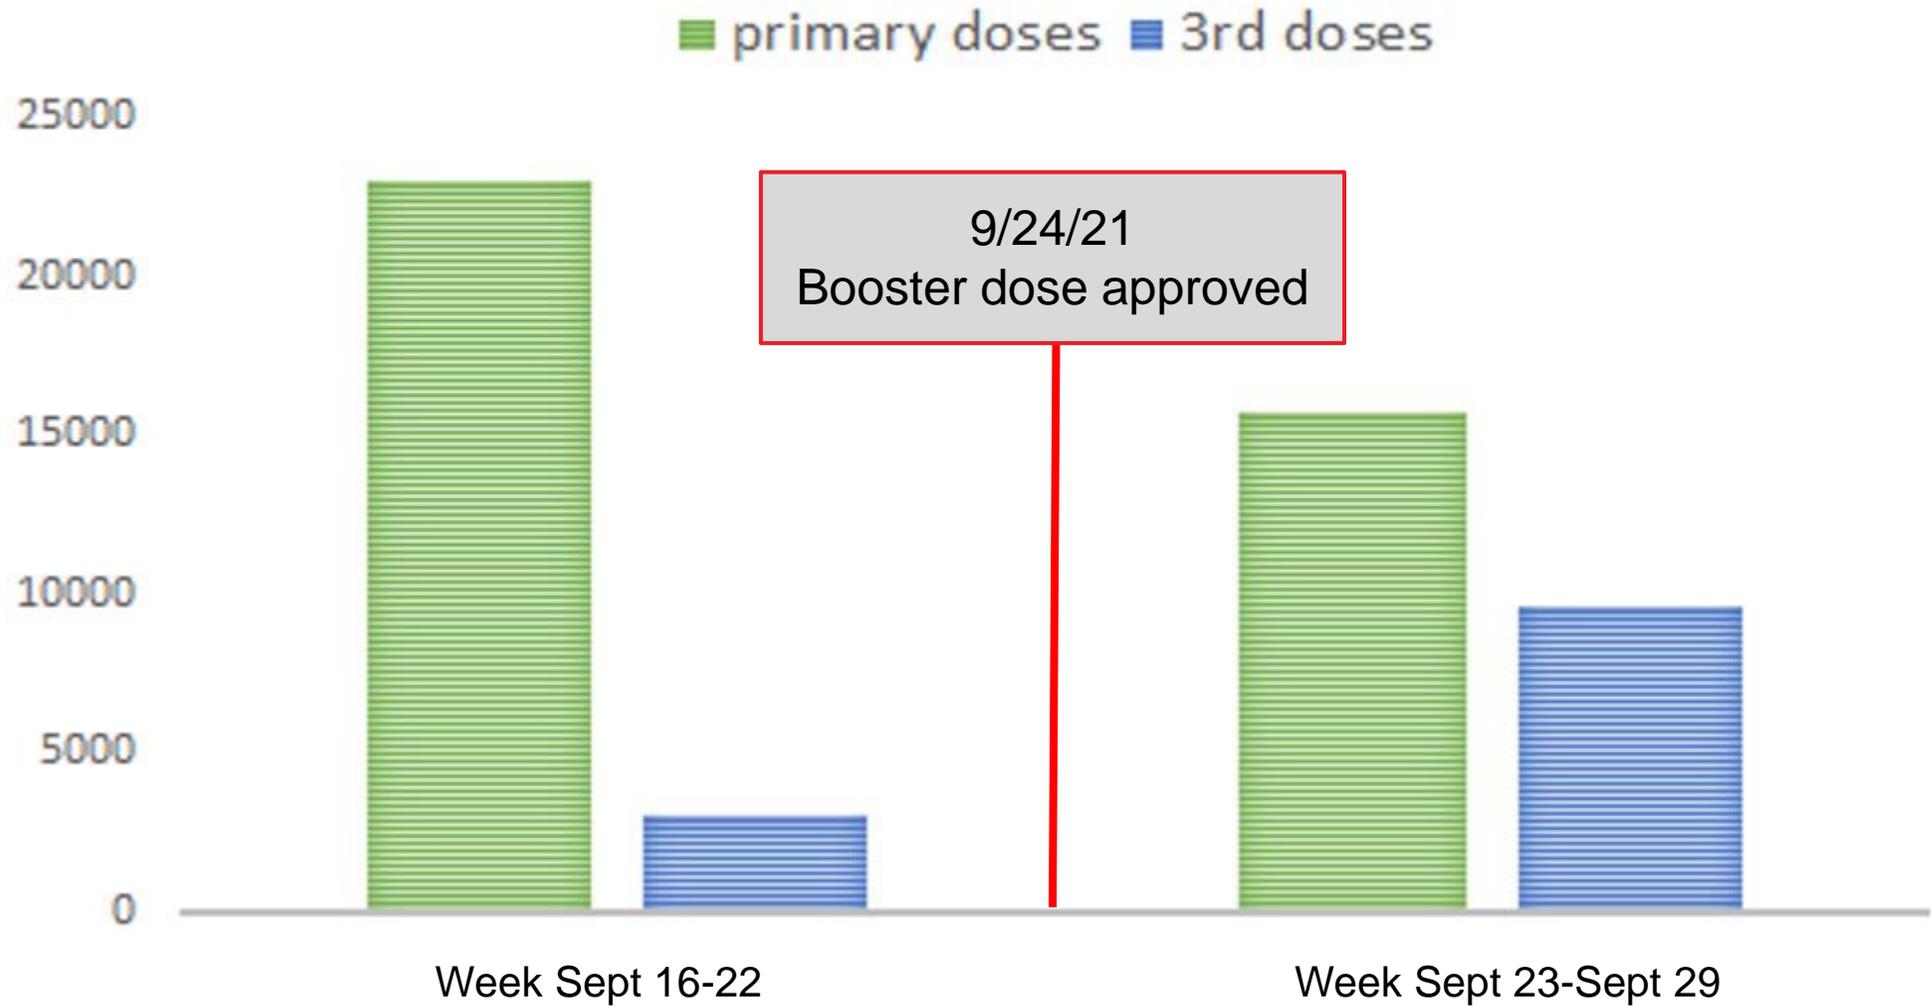

People 18-64 years old in high risk occupational and institutional settings

NM booster data

- 31,546 doses (additional and booster) given since 8/1/21
- 21,081 doses third doses given since 9/24/21

PRIMARY DOSES VS THIRD DOSES

Third dose has a similar side effect profile as the second dose

- Second dose side effects can be more intense
- Third dose side effects are similar to second
- Sign that your body is building protection
- Goes away in a few days

Common Side Effects

On the arm where you got the shot:

- Pain
- Redness
- Swelling

Throughout the rest of your body:

- Tiredness
- Headache
- Muscle pain
- Chills
- Fever
- Nausea

Effectiveness of booster doses

Dr. Fauci says booster shots provide further protection against SARS-CoV-2 infection for people at increased risk of severe COVID-19 disease, commenting that *“Twelve days or more after the booster dose, the rate of confirmed infection was lower in the booster group than in the non-booster group by a factor of 11.3 and the rate of severe illness lower by a factor of 19.5.”*

Full vaccination is still NM's first priority

COVID-19 vaccine saves lives, prevents hospitalizations, and reduces infection in seniors

Prior to vaccines, 85% of people who died of COVID-19 in the U.S. were 65+

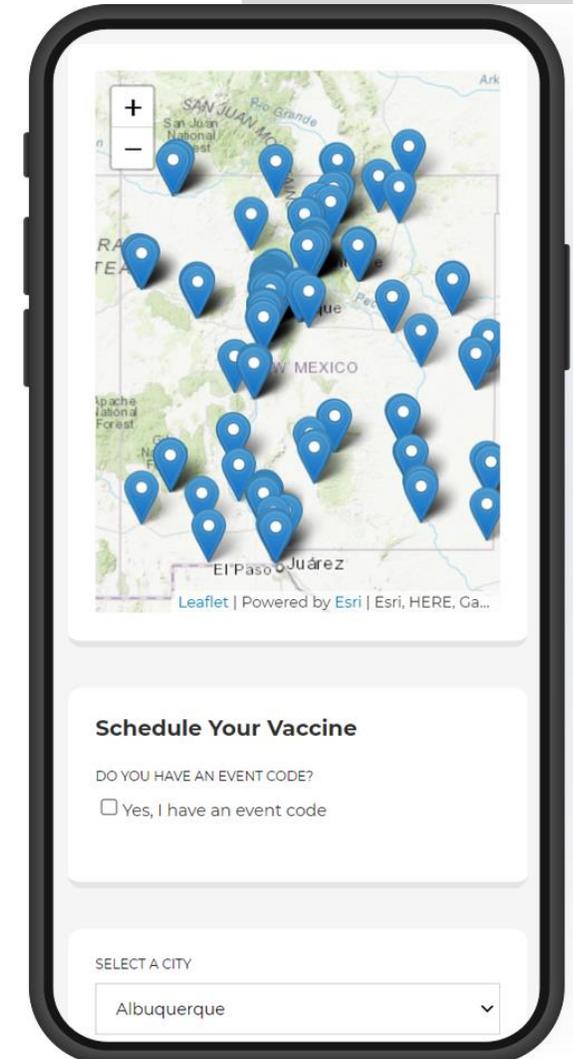

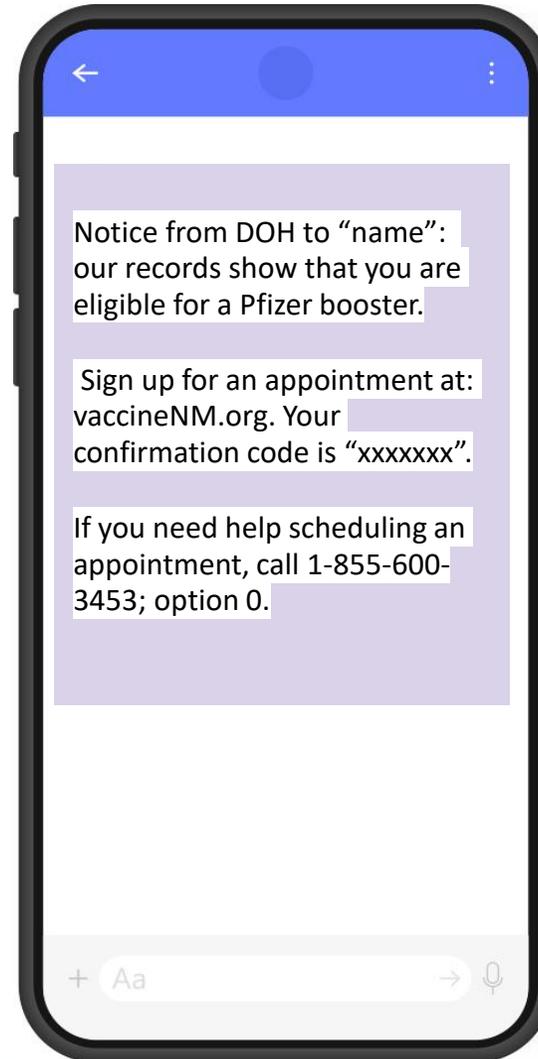

Seniors with Medicare

Vaccinations linked to: REDUCTION

- Over a quarter million COVID-19 cases
- 100,000 Hospitalizations
- 39,000 Deaths among Seniors

Schedule your vaccine appointment at [VaccineNM.org](https://vaccineNM.org) today

- Talk to your provider if you have questions about the COVID-19 vaccine or your eligibility for a booster dose
- Schedule your COVID-19 vaccine appointment with your provider, pharmacy, or on the app
- **Schedule at the same time as your flu shot**

NMDOH Call Center is here for New Mexicans without access to website

- **Call Center Purpose:** To advance equity by supporting people without internet or capacity to schedule online
- Option 3 or 9 takes callers directly to Spanish speaker
- **8 AM to 8 PM, Monday-Sunday**

I want to schedule an appointment by phone

To schedule your appointment by phone, call 1-855-600-3453, option 3 any day

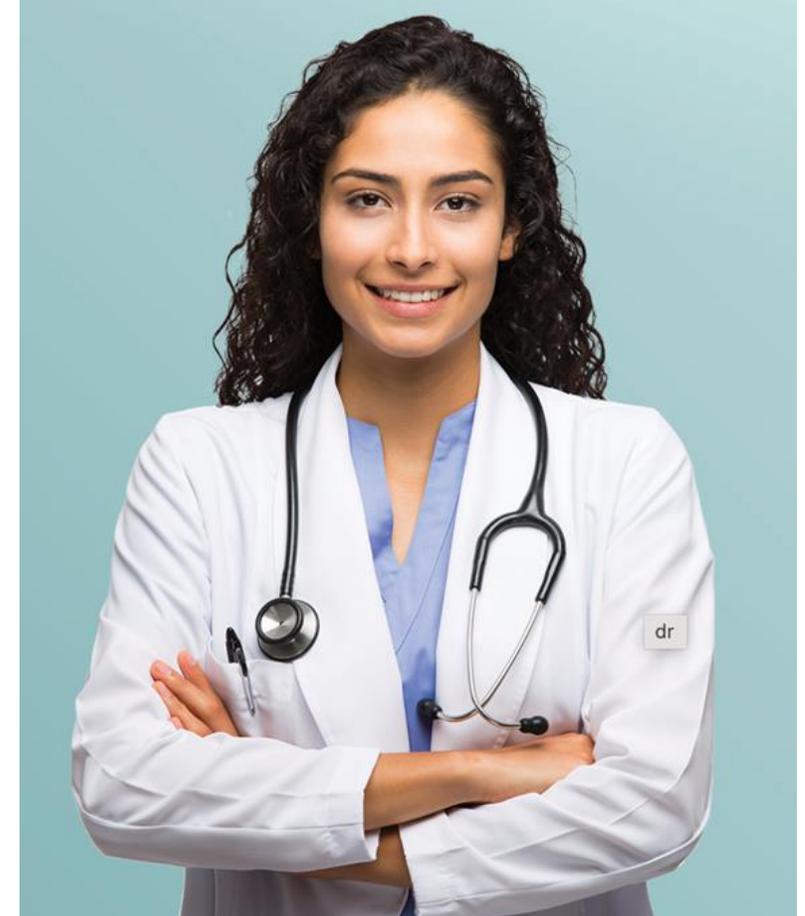

Quiero programar una cita por teléfono

Para programar su cita por teléfono, llame al 1-855-600-3453, opción 3 cualquier día

Providers, please offer the COVID-19 vaccine in your offices

- Good timing to give both the flu shot and COVID-19 vaccine together (and in same arm, if necessary)
- Medical providers are the #1 trusted source for vaccine advice
- Now is the time to become a provider: Smaller packages, up to 10 weeks in refrigerator

New Mexicans: Get tested for COVID-19 if...

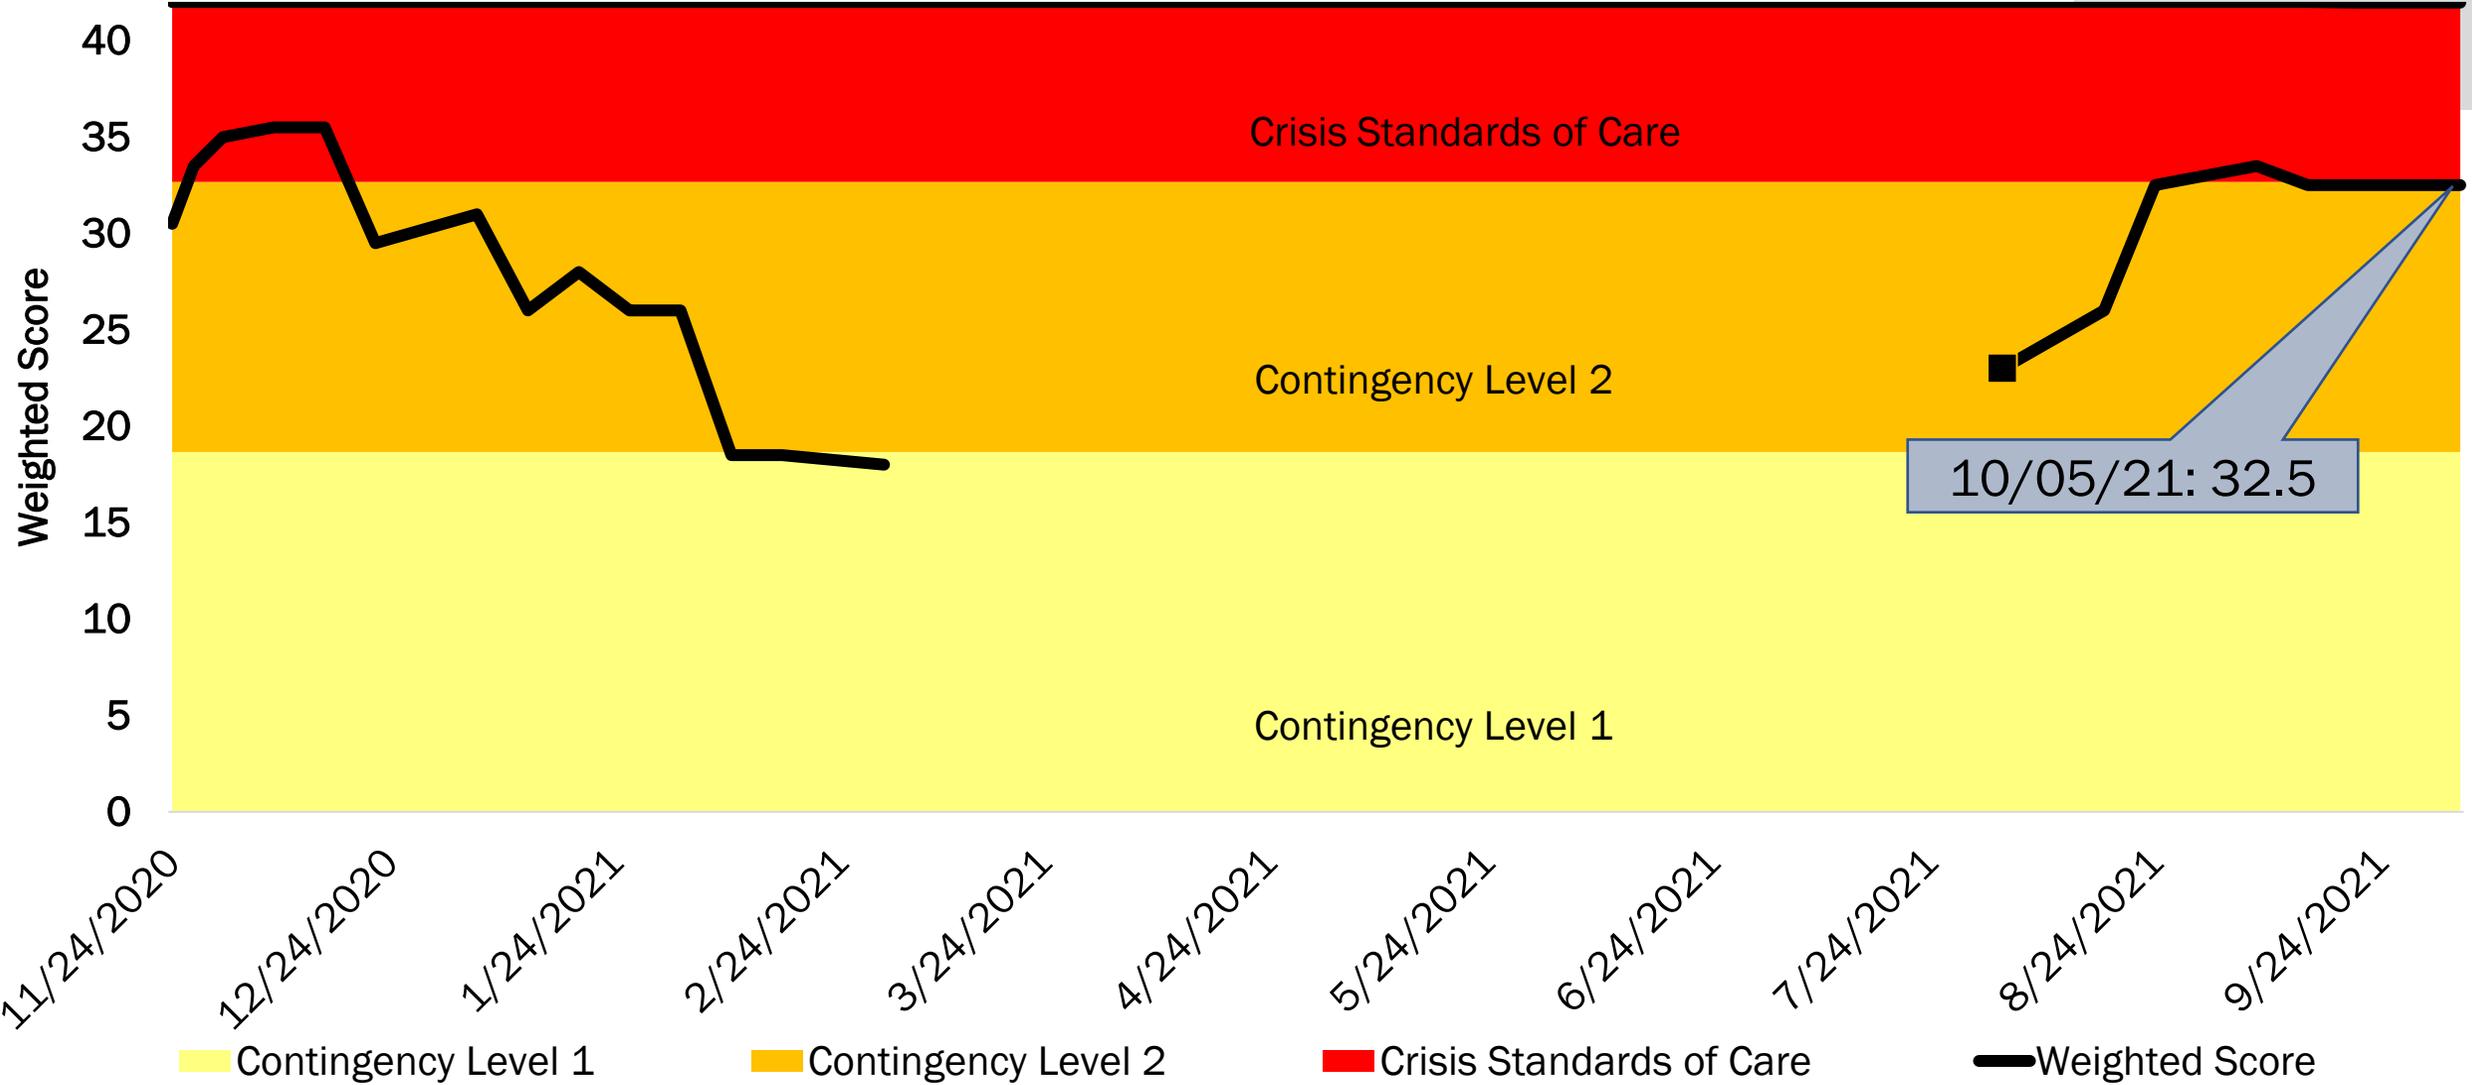

- ...you have COVID-19 symptoms;
- ...you don't have symptoms but were in close contact to a positive case;
- ...you don't have symptoms but live or work in a high-risk congregate setting; or
- ...you are a patient scheduled for surgery or hospital admission

Regardless of vaccination status!

ICU Beds

Med/Surgical Beds

NM continues to be a net exporter of hospitalizations

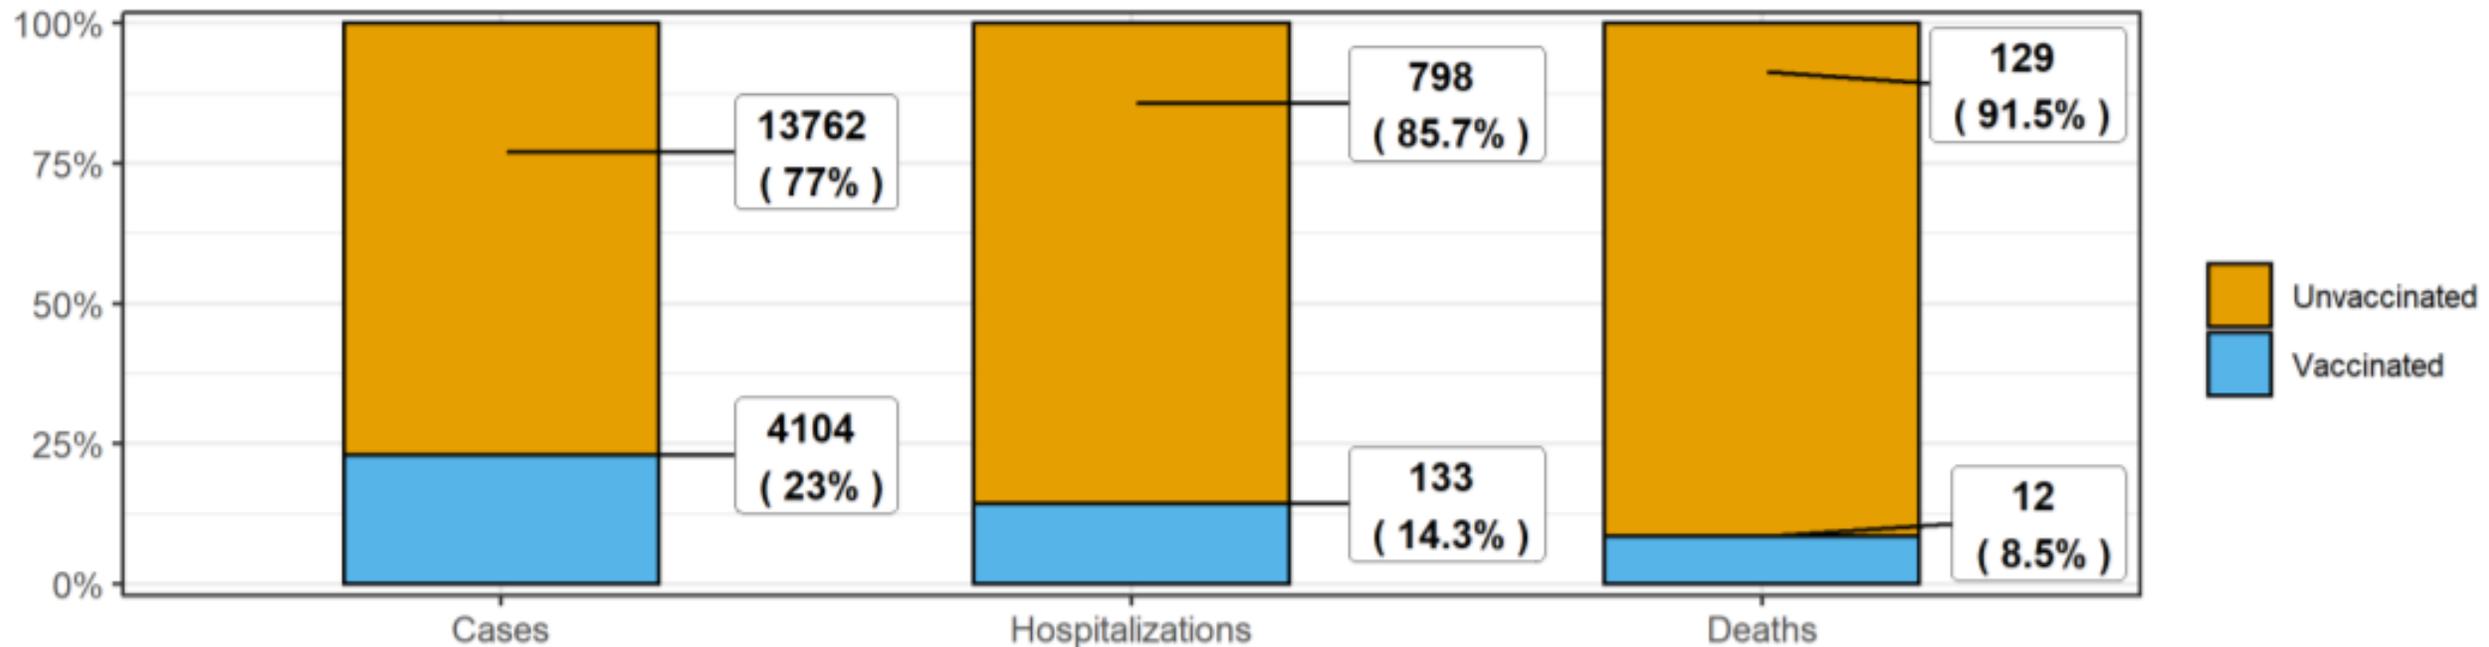

- In the last week:
 - 81 patients transferred out of state for hospitalization
 - 2 patients from out of state hospitalized in NM
 - Net = 79 patients “exported”

Exported Patients 10/04/21	
Texas	50
Other States (AZ, CO)	31
Total Exported Patients	81

Out of State Admissions 10/04/21	
Texas	2
Total Out of State Admissions	2

Getting vaccinated is the best way to prevent hospitalization or death

Percent of Cases Hospitalizations and Deaths by Vaccine Status
06 September, 2021 - 04 October, 2021

Protect yourself, your community, and your hospital: Get vaccinated!

- In September, an Oklahoma man vacationing in Taos had a heart attack
- COVID-19 cases were surging in NM and hospital capacity was stretched thin around the state
- Local and surrounding state hospitals were unable to find a bed quick enough, and the gentleman died in NM
- “If you care about your neighbor, if you care about your parents, your grandparents. Please just get vaccinated,” urges Elizabeth Kolliopoulos, daughter of the deceased

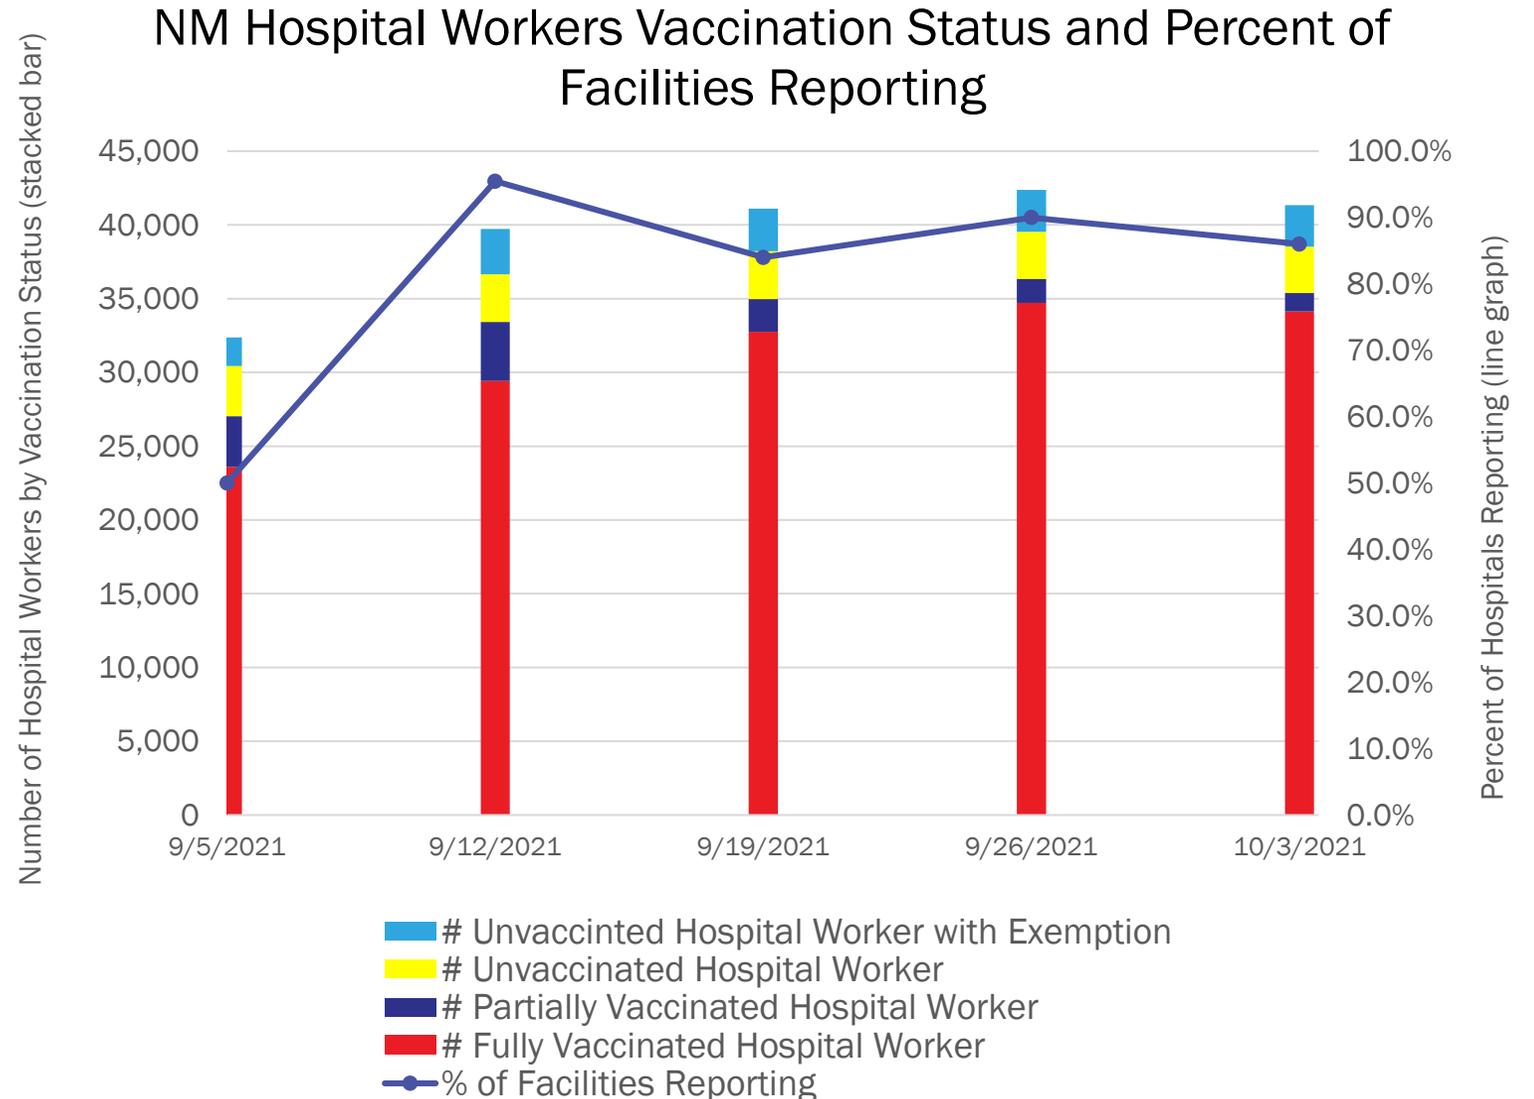

Elizabeth Kolliopoulos and her father, Ken Early

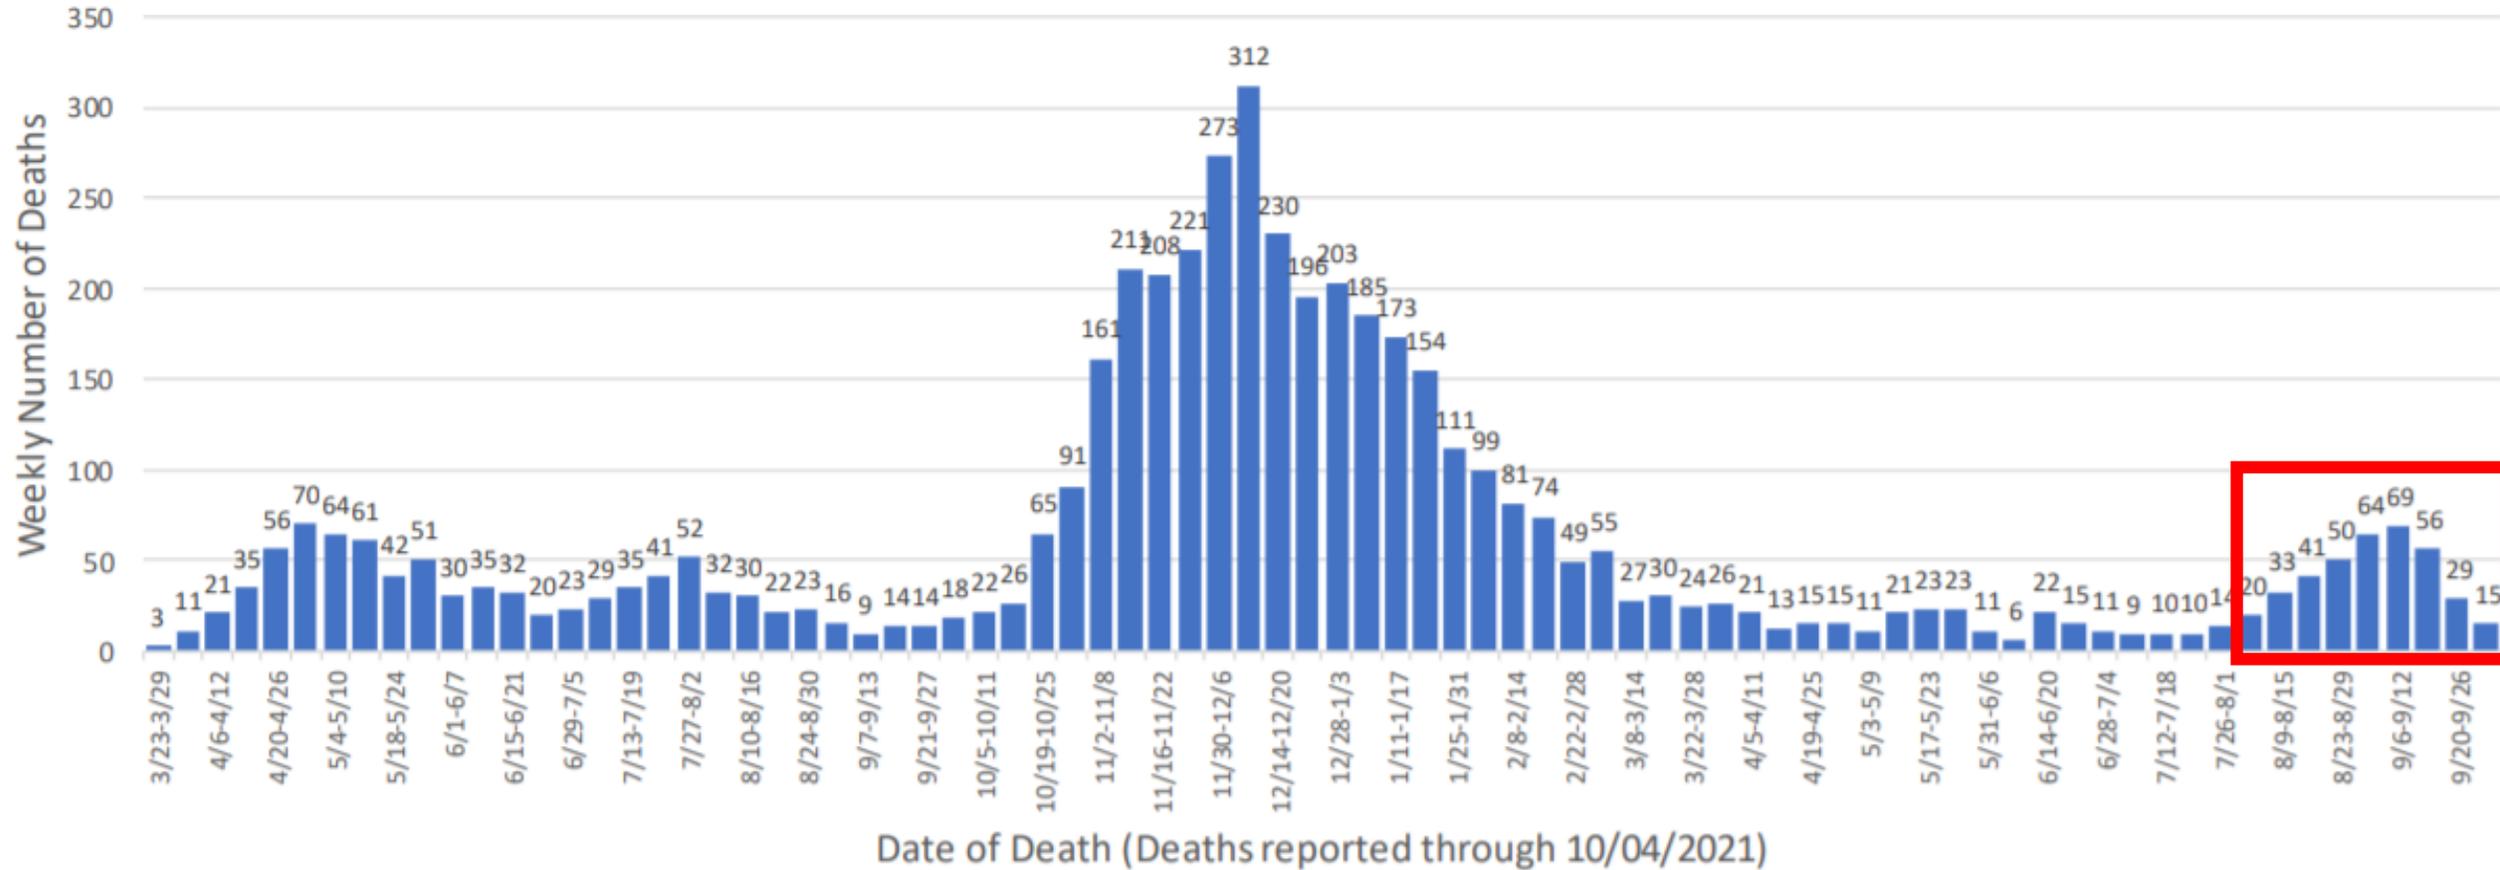

NM hospital employee vaccination rates

As of October 5, 2021:

- 89% of New Mexico’s hospital employees are fully vaccinated
- 3% are partially vaccinated
- 7% have an approved exemption
- 1% remain unvaccinated
- After a 6 week “grace period,” non-reporters now being fined

As predicted, we continue to see an increase in COVID-19 deaths

COVID-19 Treatments

There has been a significant increase in inpatient and outpatient mAbs treatments, but not enough!

Remdesivir (moderately ill, given in hospital)

mAbs (symptoms + >64, obese, OR one risk factor, given as outpatient)

mAbs provider spotlights

Below are the top outpatient mAbs providers over the last week. “Thank you!” to these facilities and all other NM mAbs providers.

- Presbyterian Healthcare System – 122
- Nor Lea Hospital – 60
- Gerald Champion Regional Medical Center – 35

New pill for COVID infection?

- Molnupiravir, comes in pill form
- In phase three trials (the last phase)
- Manufacturer claims hospitalization and death risk reduced about 50% for mild to moderate COVID infection
- Emergency Use Authorization submission planned
- This would be the first oral antiviral medication for COVID

Delta is >2x more infectious; we need to be >2x more careful

- Get tested if you think you have COVID-19 or have been exposed to someone who is positive.
- If you have a COVID-19 positive test, symptoms and risk factors, seek out monoclonal antibody treatment.
- Be especially careful indoors no matter where you live in NM.

CASE COUNTS REMAIN TOO HIGH. WE ALL STILL MUST FIGHT THE VIRUS.

- Wash hands, clean surfaces, cough into tissue/elbow.
- Everyone mask up and maintain social distancing (minimum 6').
- Get needed preventive healthcare.
- Get vaccinated!
