

COVID-19 Pediatric Case Report

November 8, 2021

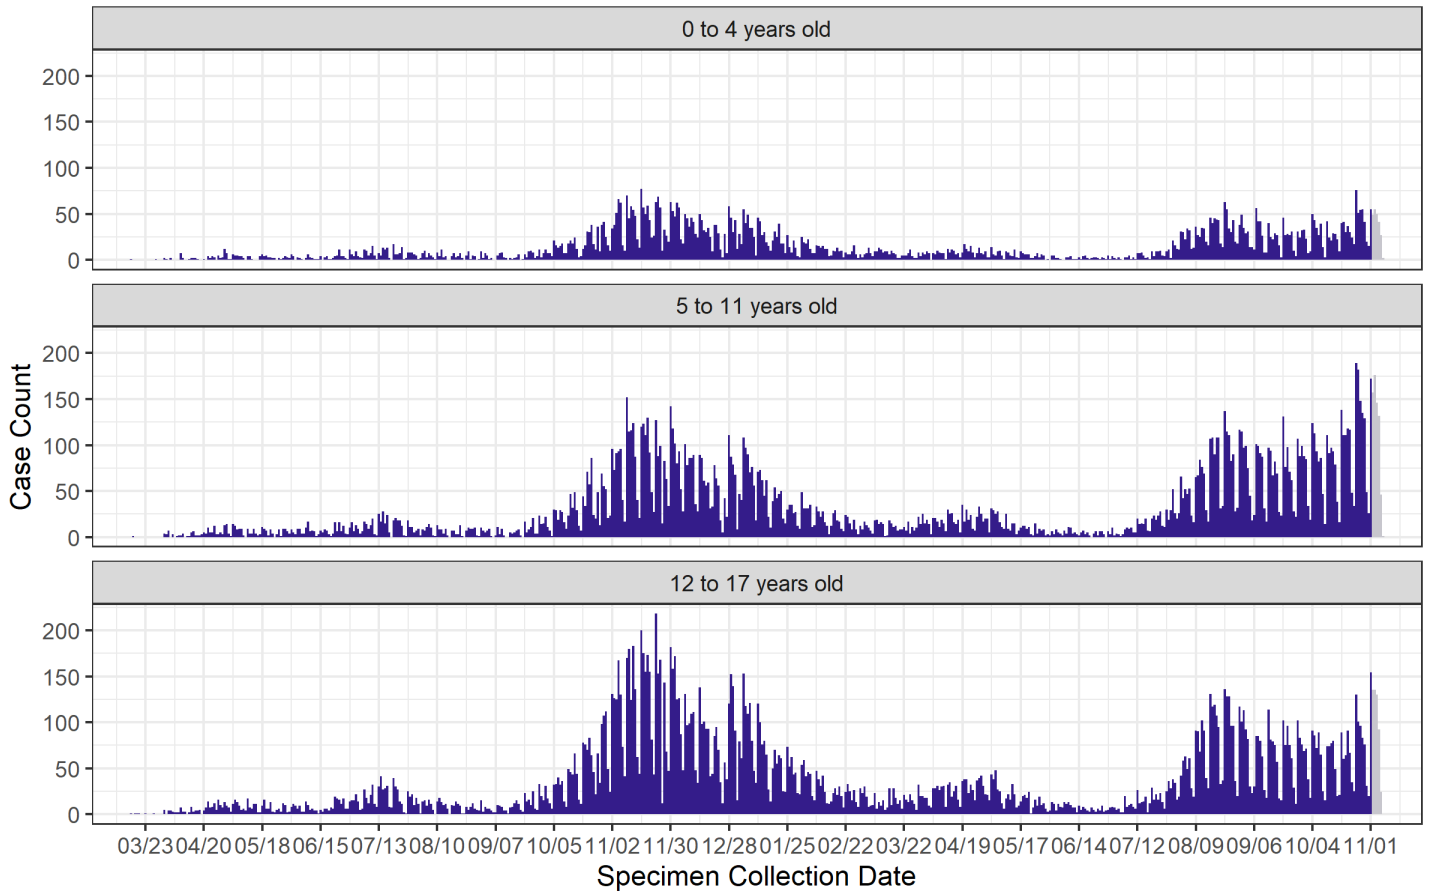

Unless stated otherwise, all data reported here exclude cases who are from out-of-state and cases who are detainees in Federal Immigration and Customs Enforcement (ICE) facilities.

Total number of pediatric cases (% of cases that are pediatric)	Number of pediatric cases in the last 7 days (% of cases in the last 7 days that are pediatric)
48986 (17.0%)	2000 (23.9%)

SECTION 1: PEDIATRIC CASE DEMOGRAPHICS

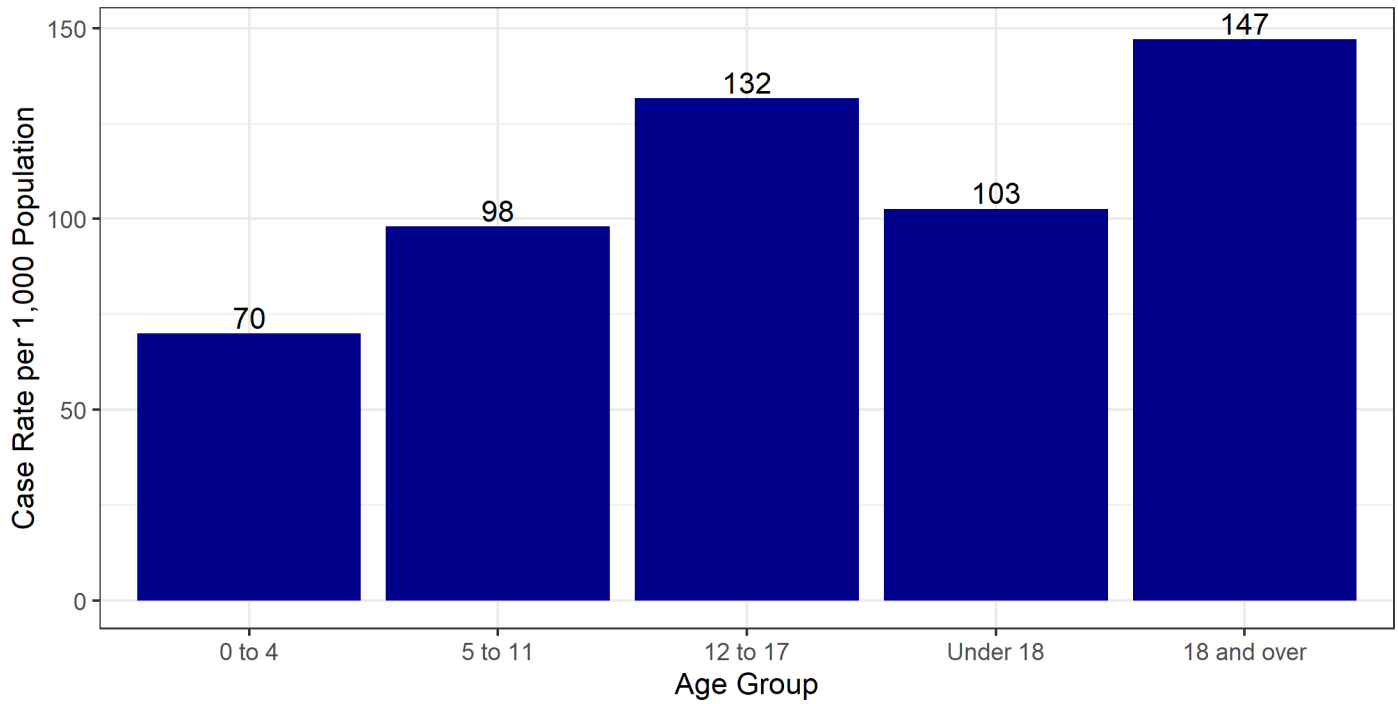

Pediatric case count over time

Pediatric Case Count over Time

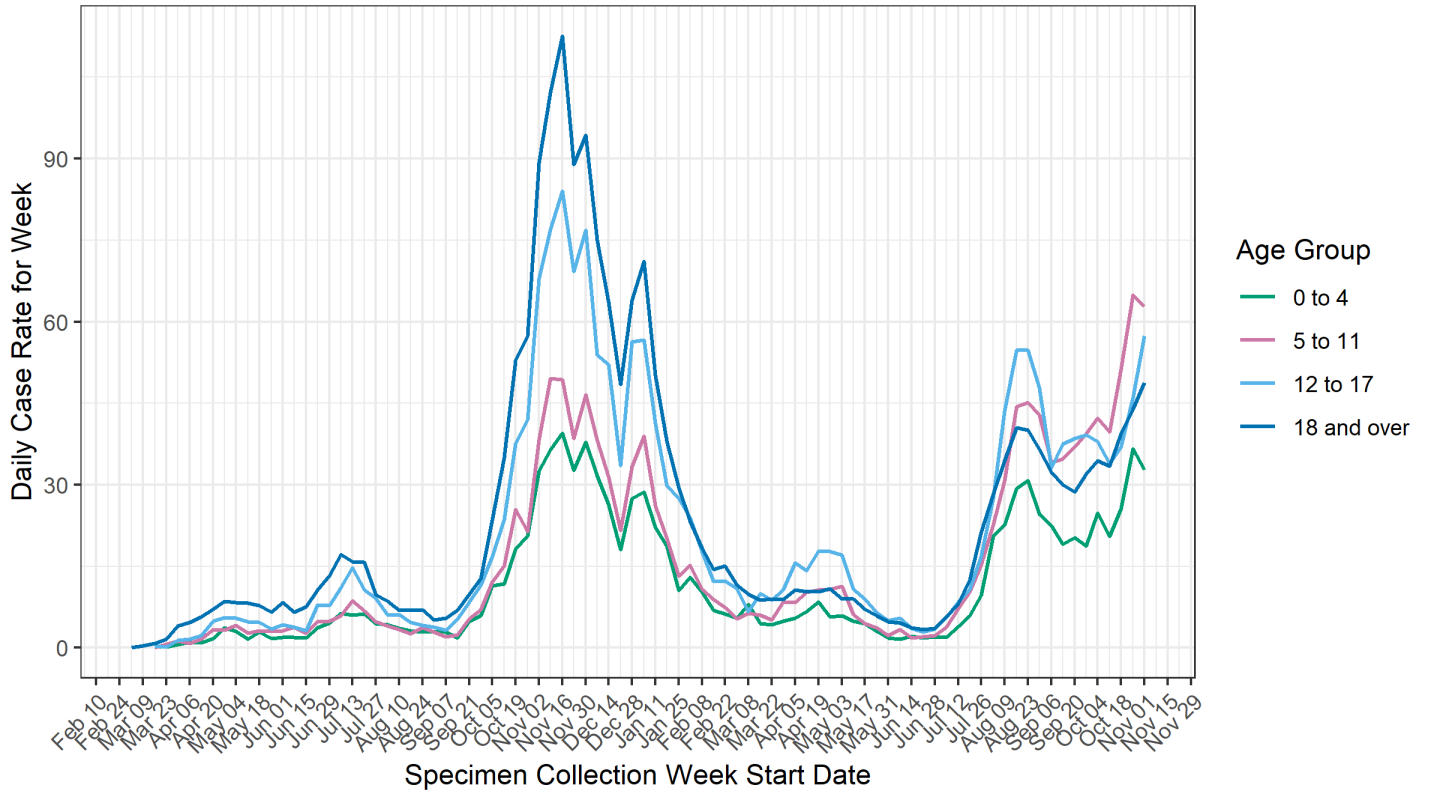

Previous 7 days are greyed out. Positive samples collected during this time may not yet be reported.

Pediatric case rate per 1,000 population by age group

Age Group	Number of Cases	Percent of Cases	Cases per 1,000	Ratio of 18 and Over to Age Group
0 to 4	8513	3.0	70.0	0.5
5 to 11	18515	6.4	98.0	0.7
12 to 17	21958	7.6	131.6	0.9
Under 18	48986	17.0	102.6	0.7
18 and over	238972	83.0	147.0	1.0

Daily pediatric case rate per 100,000 population by age group

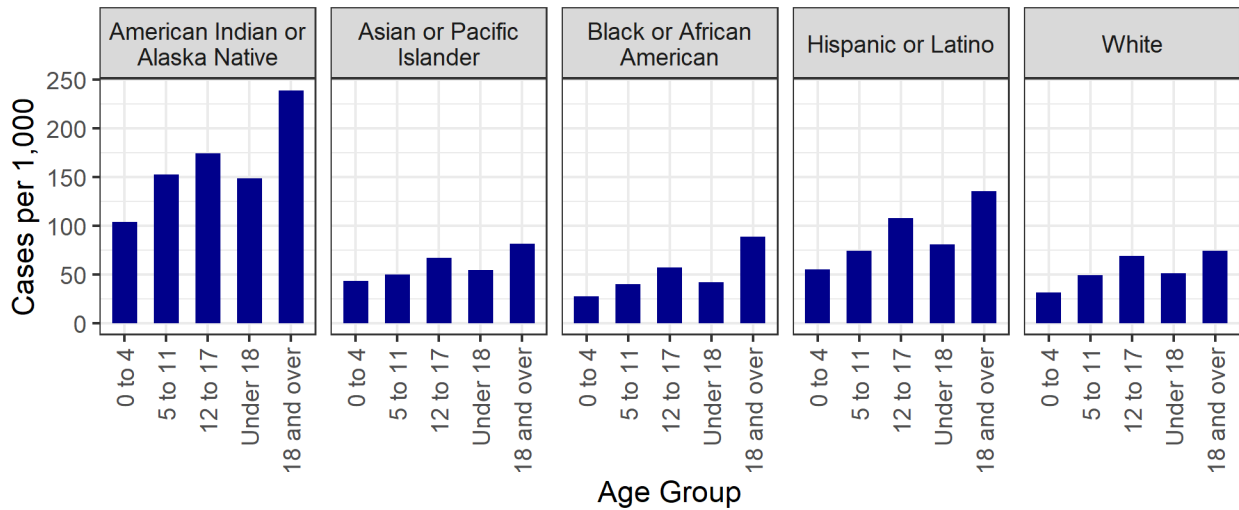

Tests collected in the last ten days may not yet have results. Recent case rates will change as these tests are processed.

Pediatric cases by sex and age

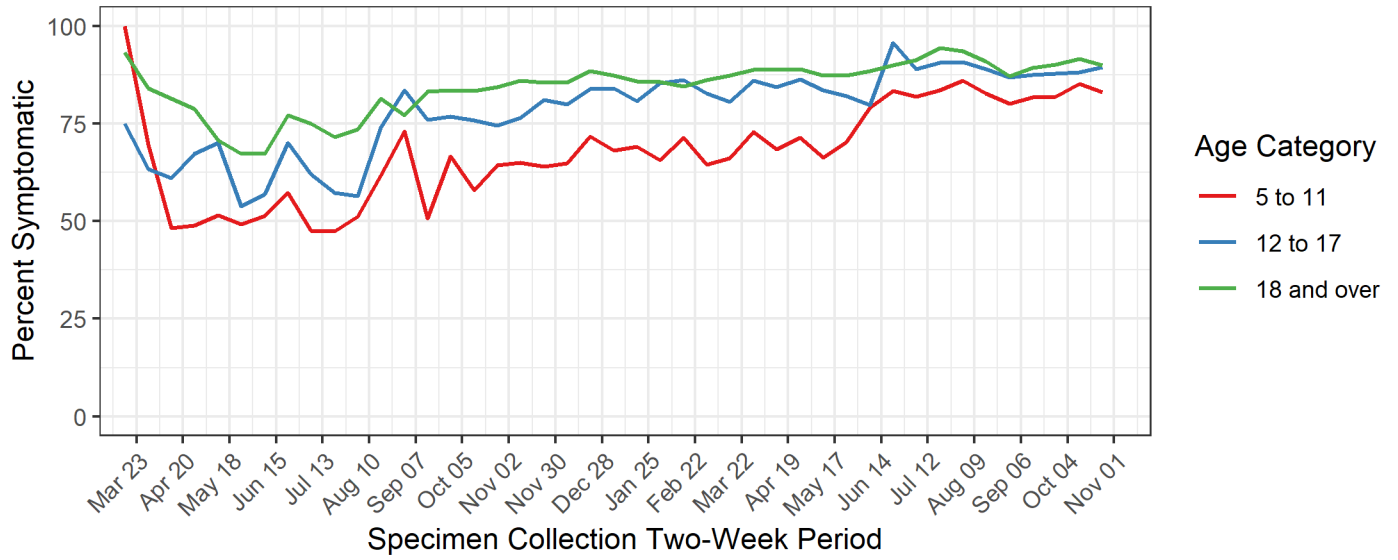

Sex	Age Group	Cases	Percent of Cases within Gender	Cases per 1,000 Population
Female	0 to 4	4070	2.7	68.3
	5 to 11	9086	6.1	98.2
	12 to 17	11171	7.5	136.0
	Under 18	24327	16.4	103.8
	18 and over	123747	83.6	149.5
Male	0 to 4	4318	3.2	69.5
	5 to 11	9192	6.8	95.4
	12 to 17	10521	7.7	124.3
	Under 18	24031	17.7	98.8
	18 and over	111789	82.3	140.2

Rates per 1,000 population of cases by age in each race/ethnicity group

Race	Age Group	Cases	Percent	Rate per 1,000
American Indian or Alaska Native	0 to 4	1291	3.1	103.8
	5 to 11	3132	7.6	152.9
	12 to 17	3179	7.7	174.4
	Under 18	7602	18.5	148.6
	18 and over	33423	81.5	239.3
Asian or Pacific Islander	0 to 4	73	2.6	43.2
	5 to 11	128	4.5	49.7
	12 to 17	165	5.8	66.9
	Under 18	366	12.9	54.4
	18 and over	2462	87.1	81.3
Black or African American	0 to 4	88	2.4	27.6
	5 to 11	196	5.4	39.7
	12 to 17	216	5.9	57.0
	Under 18	500	13.7	42.0
	18 and over	3159	86.3	88.4
Hispanic or Latino	0 to 4	4040	3.2	55.1
	5 to 11	8435	6.8	74.0
	12 to 17	10823	8.7	107.6
	Under 18	23298	18.7	80.9
	18 and over	101280	81.3	135.4
White	0 to 4	969	1.7	31.3
	5 to 11	2289	4.1	48.9
	12 to 17	2871	5.1	68.7
	Under 18	6129	11.0	51.2
	18 and over	49660	89.0	73.9

Percent of school-aged pediatric cases with symptoms by age group

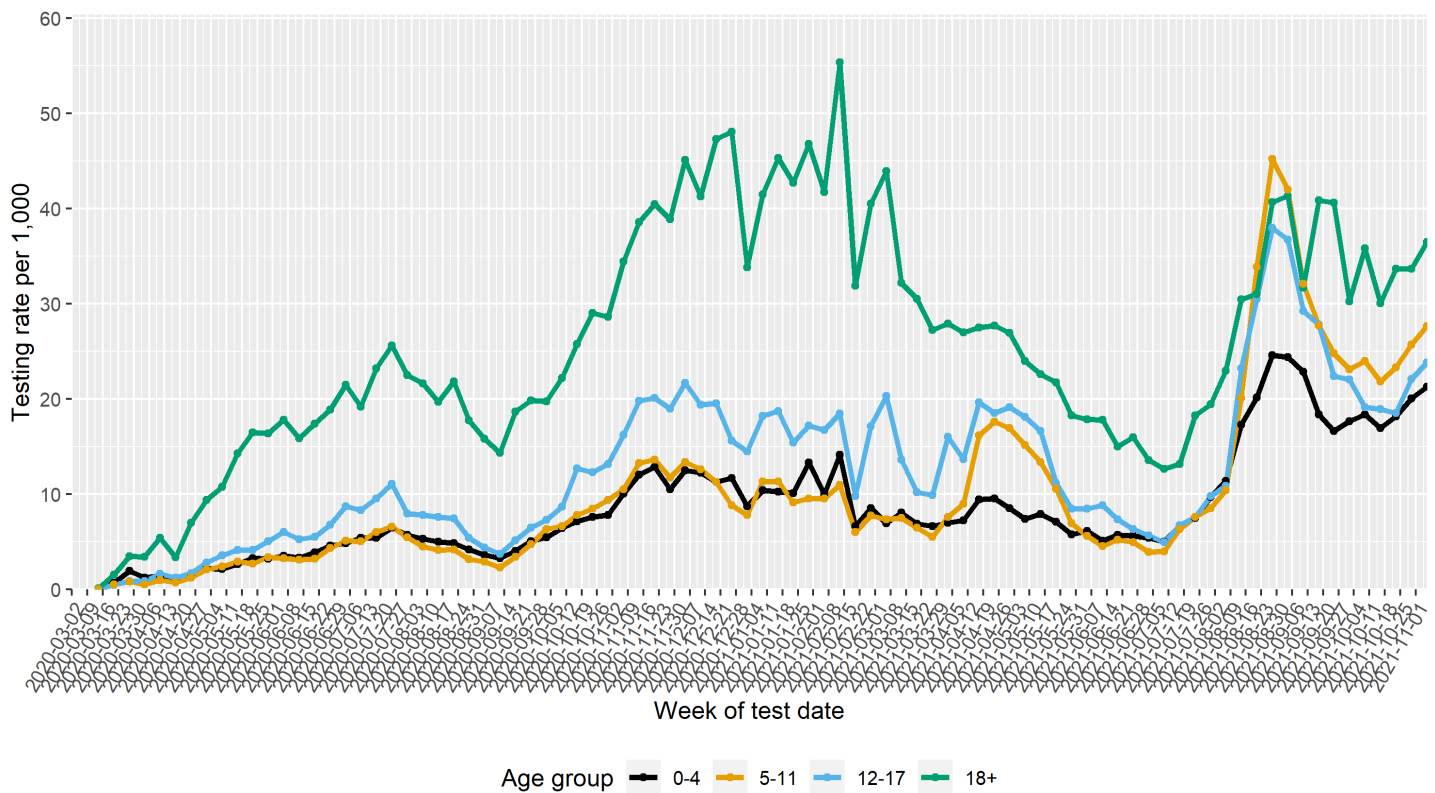

SECTION 2: PEDIATRIC TESTING RATES AND POSITIVITY

Cumulative testing rates per 1,000 population and test positivity by age group

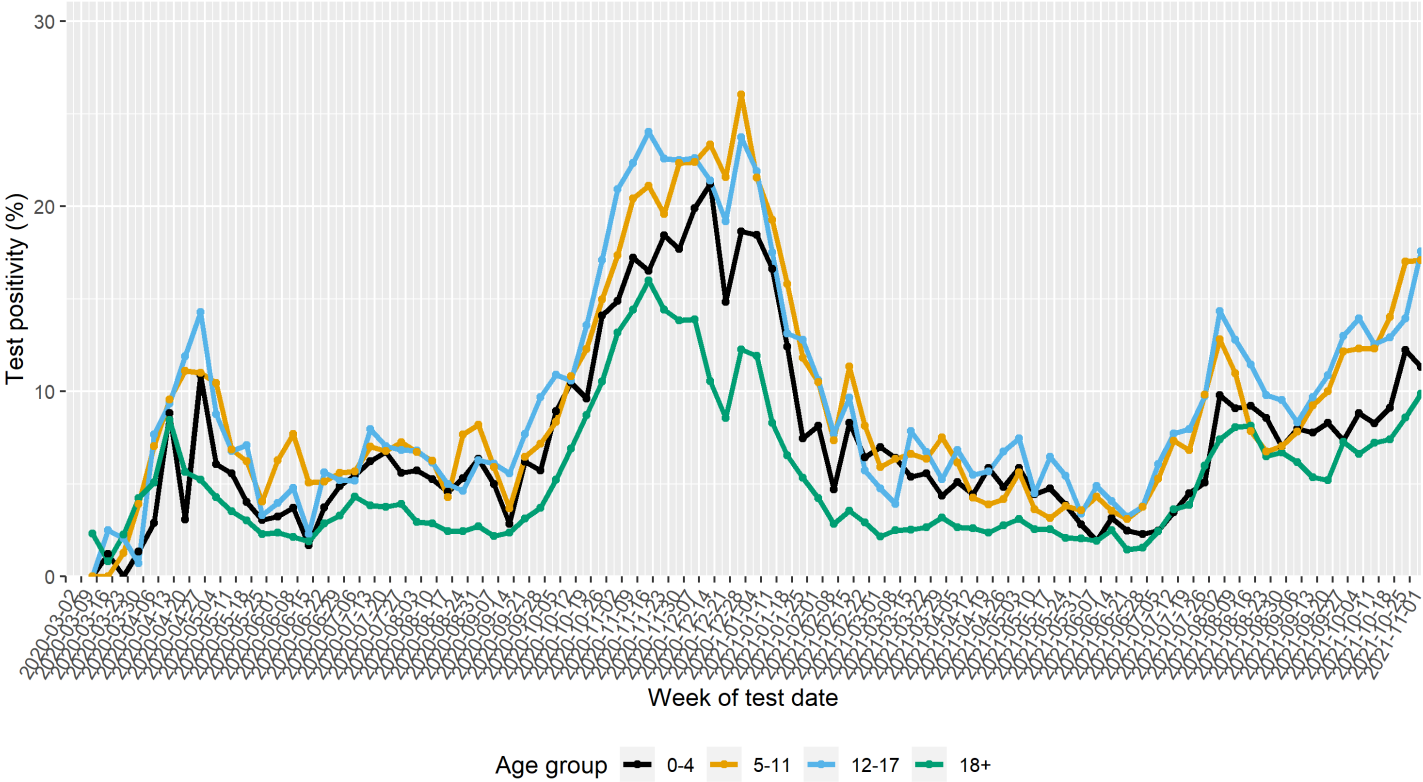

Tests include PCR and antigen

Age Group (years)	Total Number of Cases	Cumulative tests per 1,000 population	Cumulative test positivity (%)
0-4	8513	743.2	8.8
5-11	18582	880.5	10.5
12-17	21979	1100.5	11.3
18+	237379	2243.9	6.1

Testing rates per 1,000 population by age group by week

Test positivity (%) by age group by week

SECTION 3: PEDIATRIC HOSPITALIZATIONS

Out-of-state pediatric cases were excluded.

Total pediatric hospitalizations	Pediatric hospitalizations in the last week	Total Pediatric deaths
304	3	3

Hospitalization rate per 100,000 population and percentage by age group

It should be noted that due to the small number of hospitalizations of pediatric cases, the hospitalization rates per 100,000 population for these age groups should be interpreted with caution.

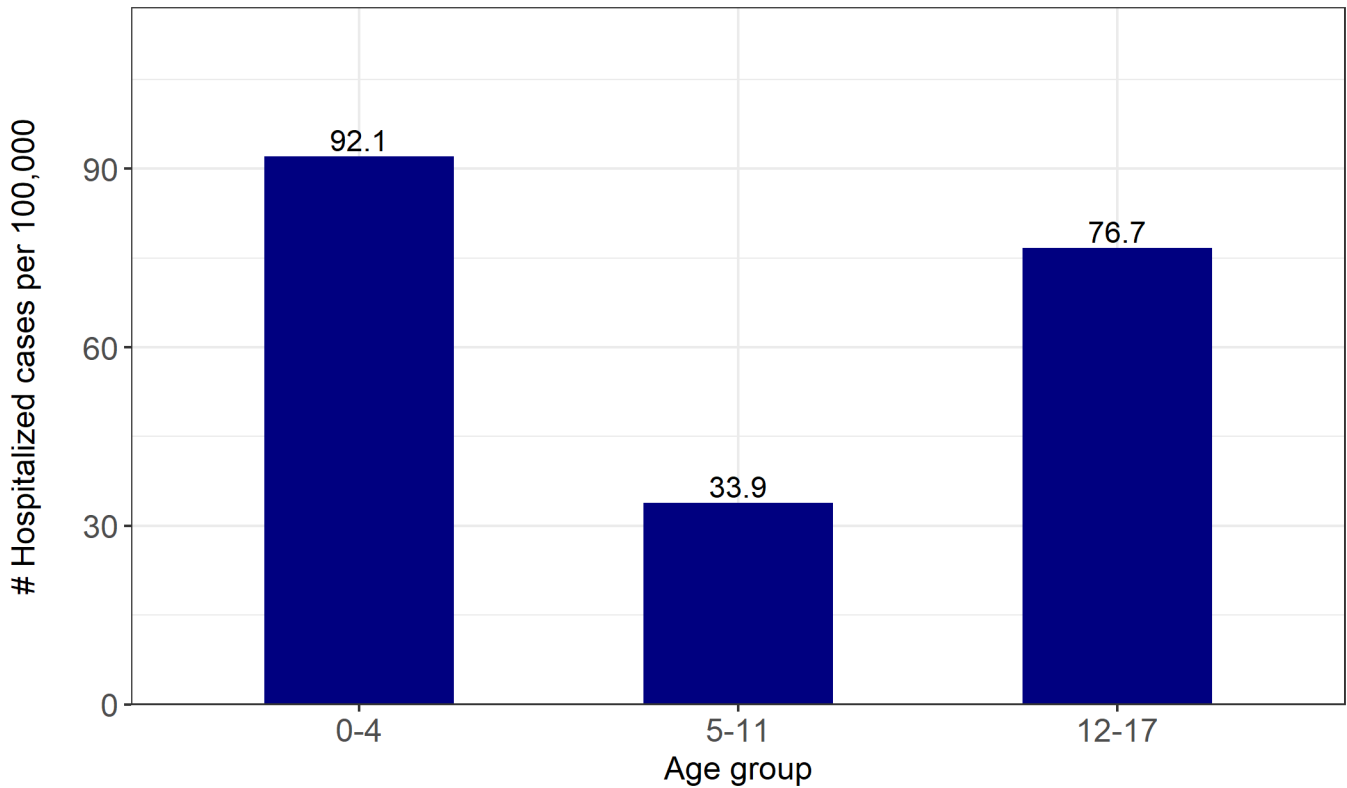

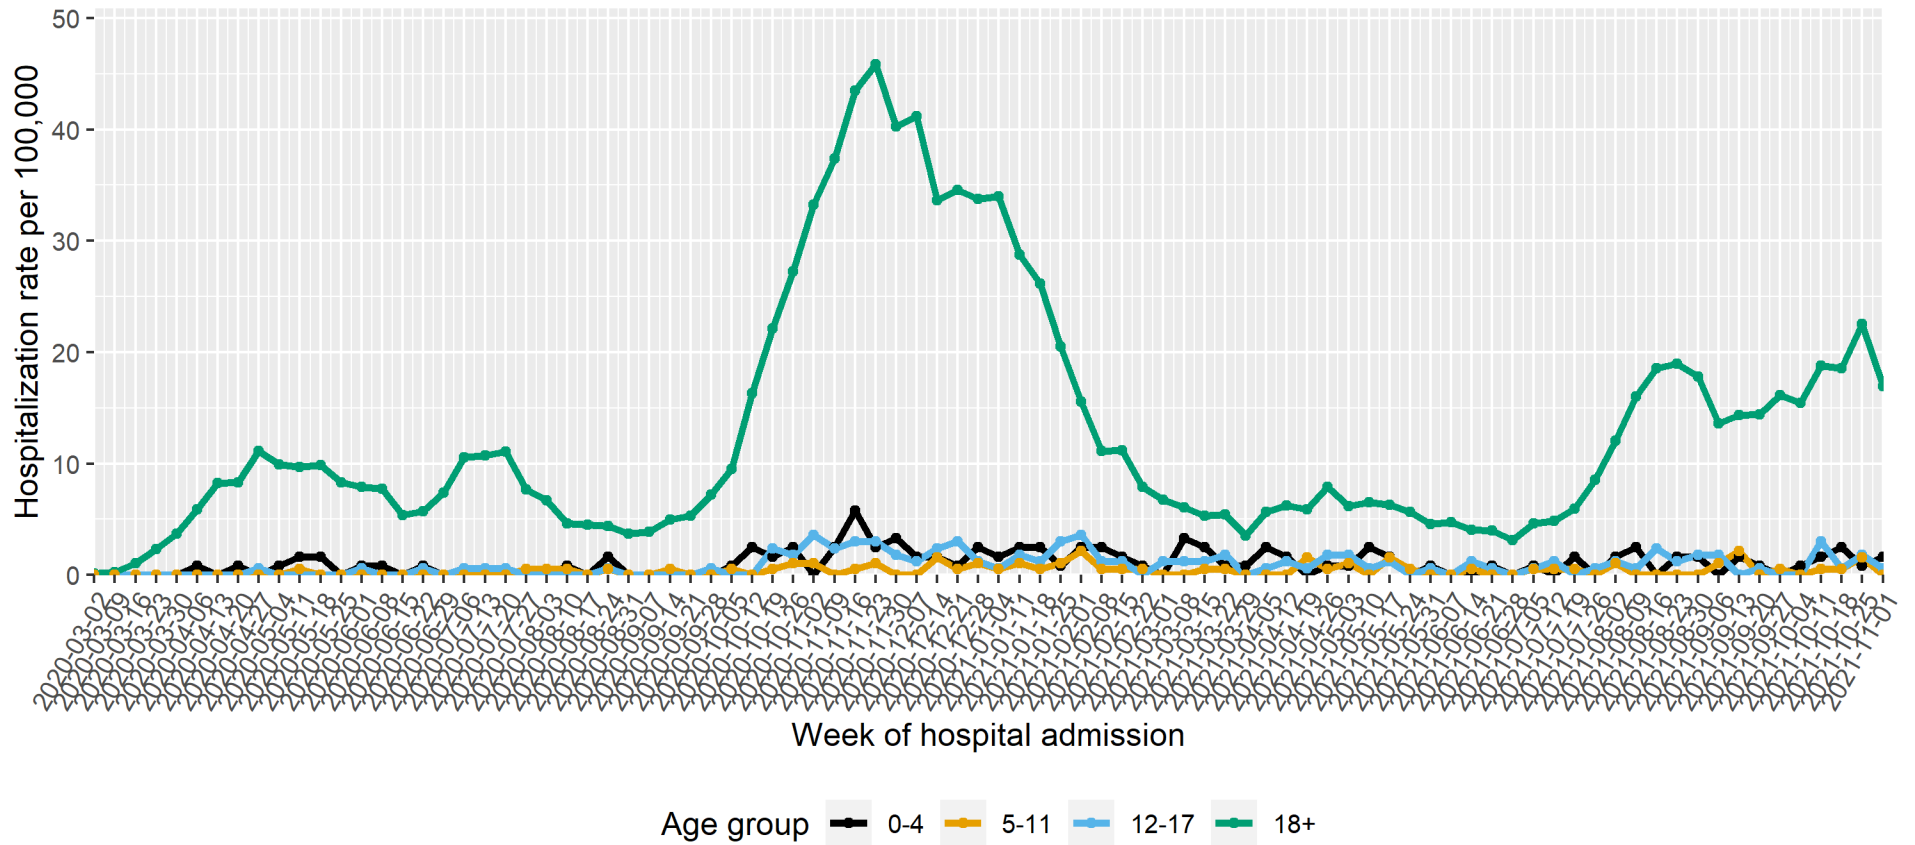

Table 1. Number of hospitalizations, percent of hospitalizations and rate of hospitalization per 100,000 for cases under 18 years old

Age group (years)	Number of hospitalizations	Percent of hospitalizations Under 18 years old	Hospitalization rate per 100,000 population
0-4	112	36.8	92.1
5-11	64	21.1	33.9
12-17	128	42.1	76.7

Table 2. Number of hospitalizations, percent of hospitalizations and rate of hospitalization per 100,000 for cases under 18 years old compared to 18 years and over

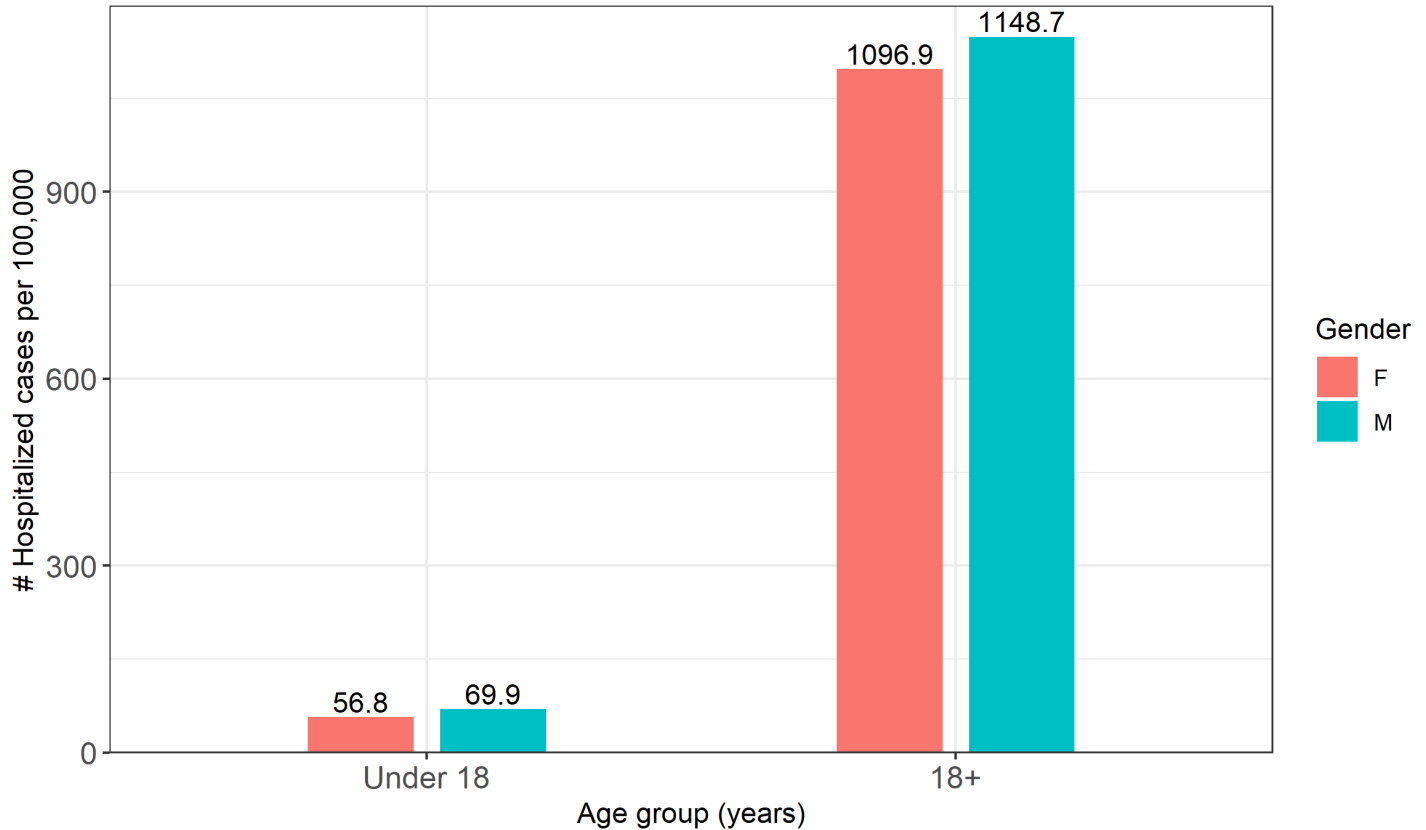

Age group (years)	Number of hospitalizations	Percent of hospitalizations Under 18 years old	Hospitalization rate per 100,000 population
Under 18	304	1.6	63.7
18+	18334	98.4	1128

Hospitalizations per 100,000 population by age each week

Note: Hospitalizations in the previous week may not yet be reported.

Hospitalization rate per 100,000 population and percentage by sex

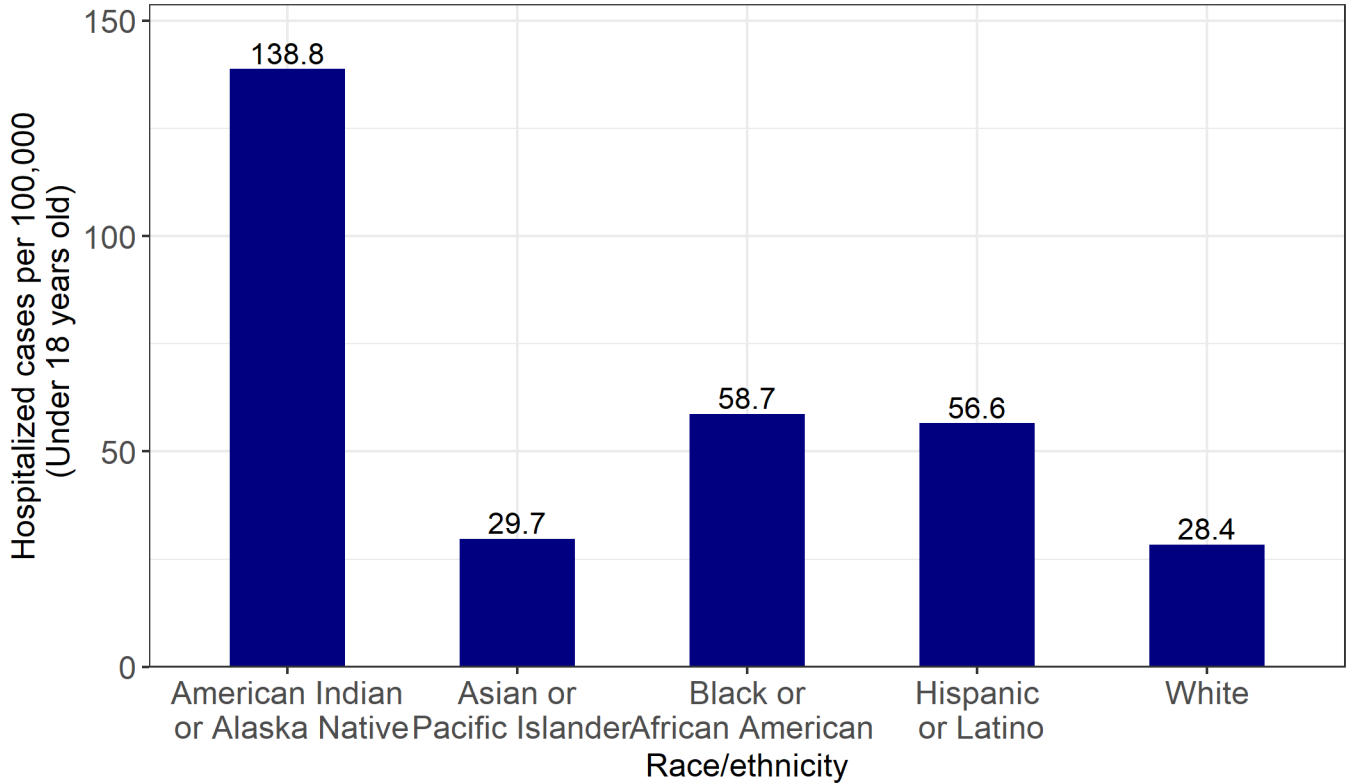

Age group (years)	Sex	Number of hospitalizations	Percent of hospitalizations within age group	Hospitalization rate per 100,000
Under 18	Female	133	43.9	56.8
	Male	170	56.1	69.9
18+	Female	9081	49.8	1096.9
	Male	9160	50.2	1148.7

Note: **164** cases were excluded due to missing or unknown sex information.

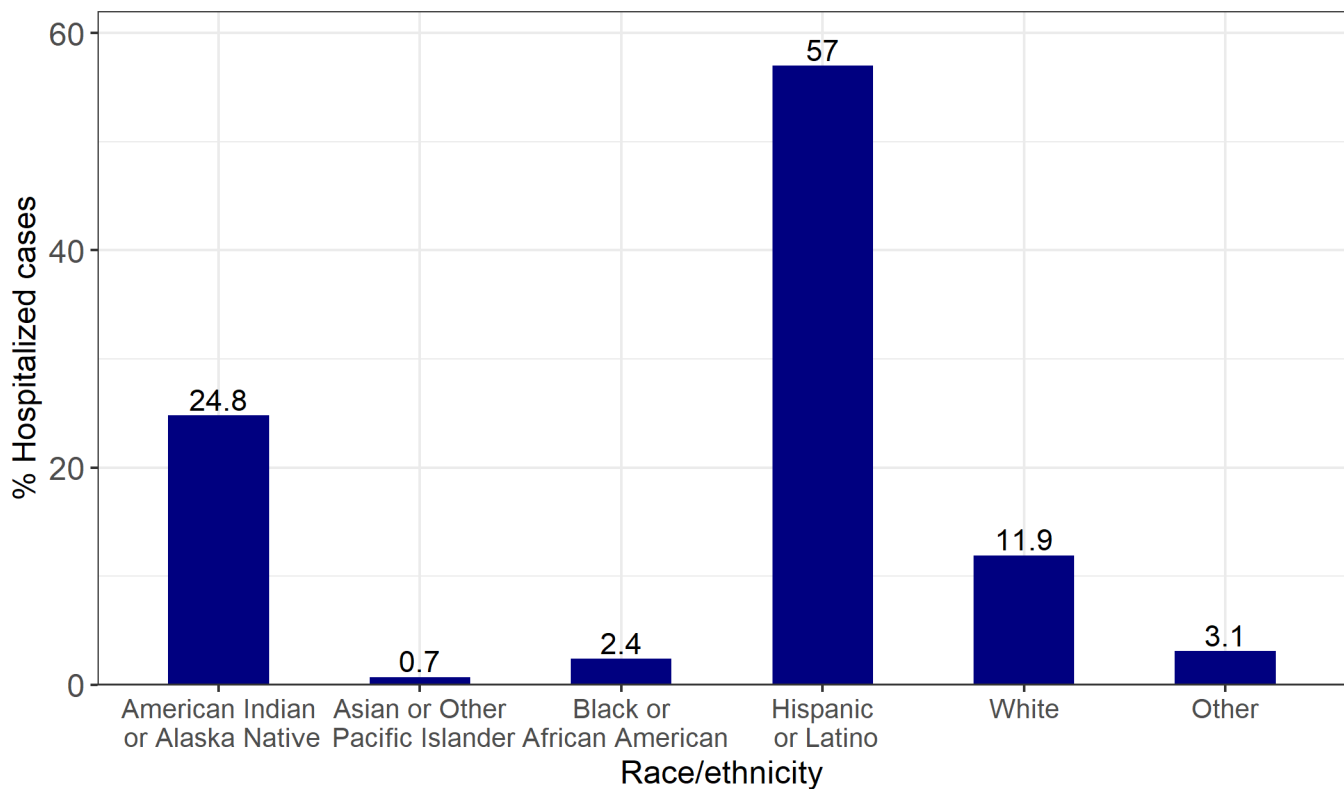

Finding: The hospitalization rate per 100,000 population is similar between males and females within the Under 18 and over 18 years age groups. It should be noted that due to the small number of hospitalizations of pediatric cases, the hospitalization rates per 100,000 population for these age groups should be interpreted with caution.

Hospitalization rate per 100,000 population and percentage by race/ethnicity

Finding: In the Under 18 years old age group, the hospitalization rate per 100,000 population is the highest in American Indian or Alaska Native children at **138.8** followed by Black or African American at **58.7**. However, Hispanic or Latino children make up **57.0%** of the total number of pediatric cases hospitalized, followed by American Indian or Alaska Native children, at **24.8%**. It should be noted that due to the small number of hospitalizations of pediatric cases, the hospitalization rates per 100,000 population for these age groups should be interpreted with caution.

Note: For Under 18 years age group, **15** cases had missing race/ethnicity information and were excluded. **12** cases “Refused to answer” or answered “Other” and were also excluded.

Age group (years)	Race/ethnicity	Number of hospitalizations	Percent of hospitalizations within age group	Hospitalization rate per 100,000 population
Under 18	American Indian or Alaska Native	71	24.8	138.8
	Asian	2	0.7	29.7
	Black or African American	7	2.4	58.7
	Hispanic or Latino	163	57	56.6
	White	34	11.9	28.4
18+	American Indian or Alaska Native	5125	29.1	3670
	Asian	187	1.1	617.4
	Black or African American	230	1.3	643.8
	Hispanic or Latino	7357	41.8	983.8
	White	4439	25.2	660.8

Notes:

- For Under 18 years age group, **15** cases had missing race/ethnicity information and were excluded. **12** cases “Refused to answer” or answered “Other” and were also excluded.
- For the “18+” years age group, **695** had missing race/ethnicity information and were excluded. **301** cases “Refused to answer” or answered “Other” and were also excluded.
- Rates for Native Hawaiian or Other Pacific Islanders and “Other” are excluded, as there are no population estimates for these populations.

Data Sources

- **COVID-19 data**
 - **New Mexico Electronic Disease Surveillance System (NM-EDSS)**, Infectious Disease Epidemiology Bureau, Epidemiology and Response Division, New Mexico Department of Health.
 - **Salesforce/MTX COVID-19 Case Investigation Platform.**
- **Population Estimates:** University of New Mexico, Geospatial and Population Studies (GPS) Program.

Data Notes

- **The data reported in this weekly update may not match the daily numbers that are reported in the New Mexico Department of Health (NMDOH) press releases and/or the NMDOH COVID-19 data dashboard. This may be due to variation in the date and time of data extraction from NM-EDSS, corrections after quality assurance review, and differences in the exclusion criteria.**
- **New Mexico Electronic Disease Surveillance System (NM-EDSS).** Disease incidence data are derived from reports of notifiable infectious diseases. NMDOH relies on health care providers, laboratories, hospitals, clinics, institutions and individuals to report suspected and confirmed notifiable infectious diseases in accordance with New Mexico Administrative Code 7.4.3.13. Under-reporting can occur due to lack of awareness about reporting requirements or lack of compliance with those requirements. Not all cases of infectious diseases can be detected for various reasons including lack of access to health care services, lack of laboratory testing or concerns about confidentiality. Specific and standardized national case definitions are used to classify disease reports by case status.
- **New Mexico Population Estimates.** All population estimates apply to July 1 of 2019. Estimates include decimal fractions. The sum of population subgroup estimates may not exactly equal the overall state population estimate due to rounding error. Population estimates for previous years are occasionally revised as new information becomes available. When publishing trend data, always be sure that your rates for earlier years match current rates on NM-IBIS that have been calculated with the most up-to-date population estimates.
- **Race/Ethnicity.** Race/Ethnicity are reported as a single variable according to the selection of the case. Any case who is Hispanic is in the Hispanic category and all other races are non-Hispanic.
- **Gender** refers to a person's internal sense of being male, female, some combination of male and female, or neither male nor female. **Sex** refers to the biological anatomy of an individual's reproductive system, and secondary sex characteristics.
- **Case rate per 100,000 population.** A basic measure of disease-specific case frequency is a rate, which takes into account the number of cases and the population size. It is helpful in making public health decisions for a given population, relative to another population regardless of size.
