NEW MEXICO COVID-19 MORTALITY UPDATE

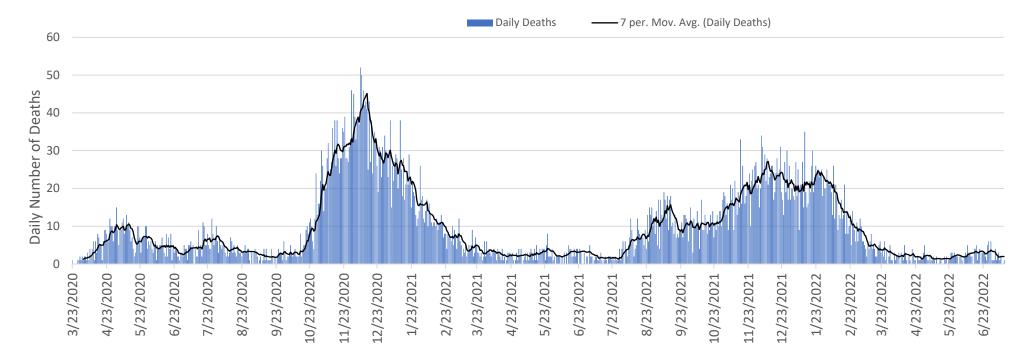

July 18, 2022

All data reported here exclude cases who live out-of-state.

Total Deaths	Deaths in the Last 14 Days
8,079	17

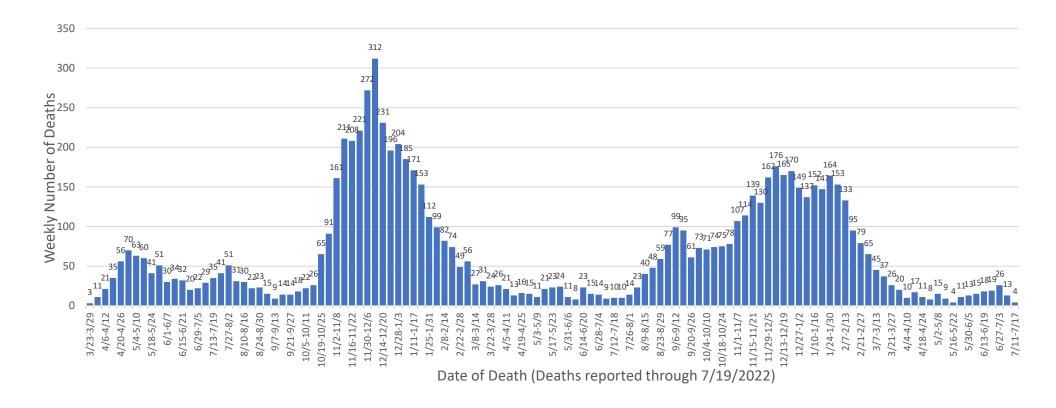

SECTION 1: DEATH COUNTS

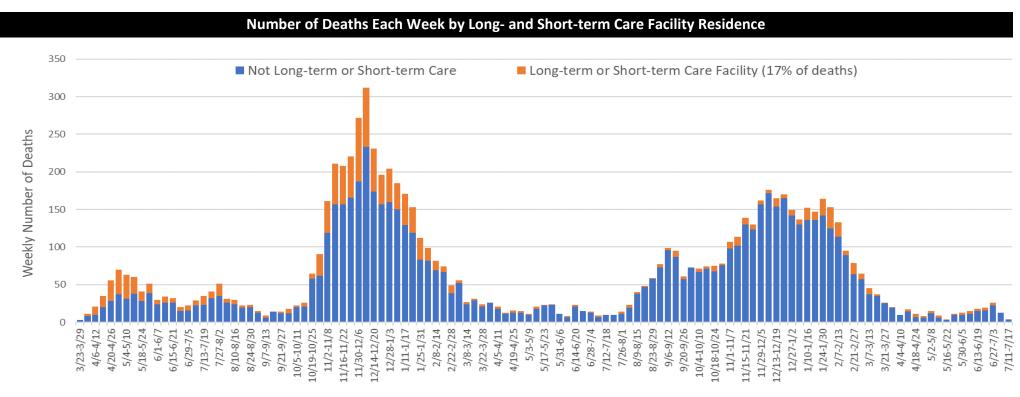

Daily Number of Deaths and 7-day Moving Average

Date of Death (Deaths reported through 7/19/2022)

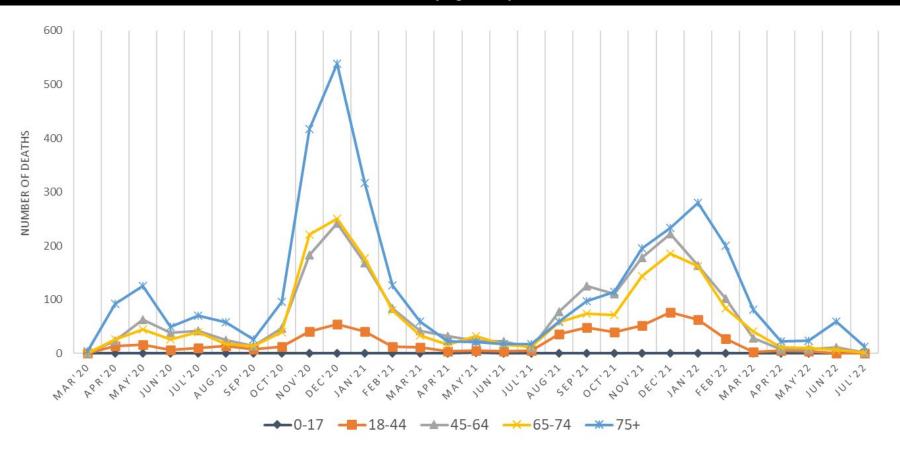

Number of Deaths Each Week

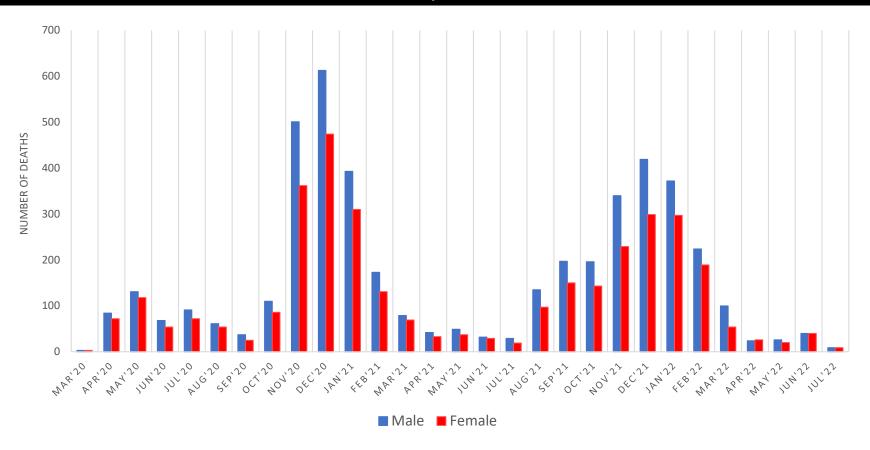

Date of Death (Deaths reported through 7/19/2022)

Percentage of Deaths by Underlying Condition and Age Group

Number and percent of deaths by Test Result and Cause of Death on the Death Certificate

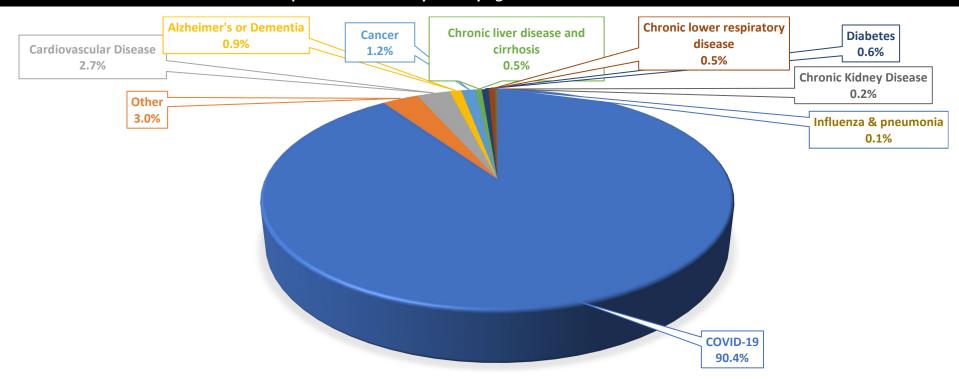

Positive COVID-19	COVID-19 Cause/Contributor of Death on Death	Number of	
Test Result ¹	Certificate	Deaths	Percent
Yes	Yes	7307	90.4%
Yes	No	191²	2.4%
No	Yes	581	7.2%
Total		8079	100.0%

¹ Positive RT-PCR or Rapid Test

² Beginning January 1, 2022, deaths due to natural causes matched to a SARS-CoV-2 positive test result within

³⁰ days of the date of death are included as COVID-19 related deaths even when COVID is not listed on the death certificate.

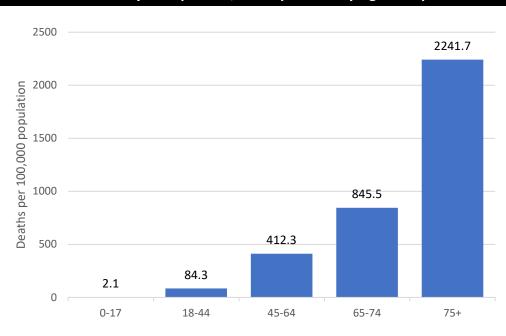

Number and percent of deaths by underlying cause of death on the death certificate

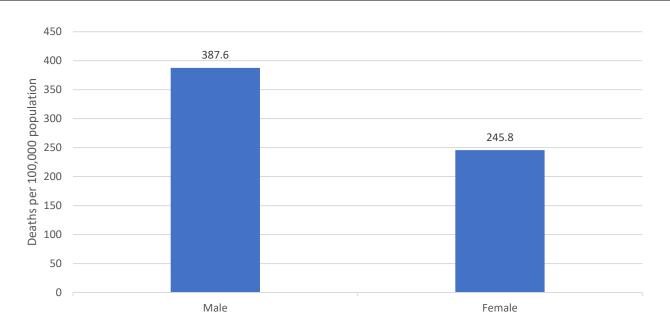

Underlying Cause	Number of Deaths*	Percent
COVID-19	7076	90.4%
Other	232	3.0%
Cardiovascular Disease	213	2.7%
Alzheimer's or Dementia	74	0.9%
Cancer	93	1.2%
Chronic liver disease and cirrhosis	38	0.5%
Diabetes	44	0.6%
Chronic lower respiratory disease	37	0.5%
Chronic Kidney Disease	13	0.2%
Influenza & pneumonia	6	0.1%
Total	7826	100.0%
*Excludes 253 (3%) deaths which have not yet been coded by the National Center for Health Statistics.		

SECTION 2: MORTALITY RATES

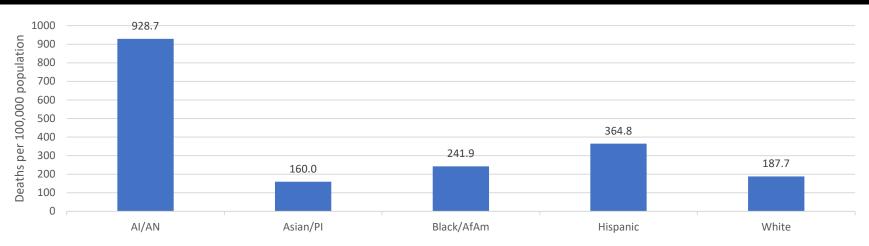

Mortality Rate per 100,000 Population by Age Group

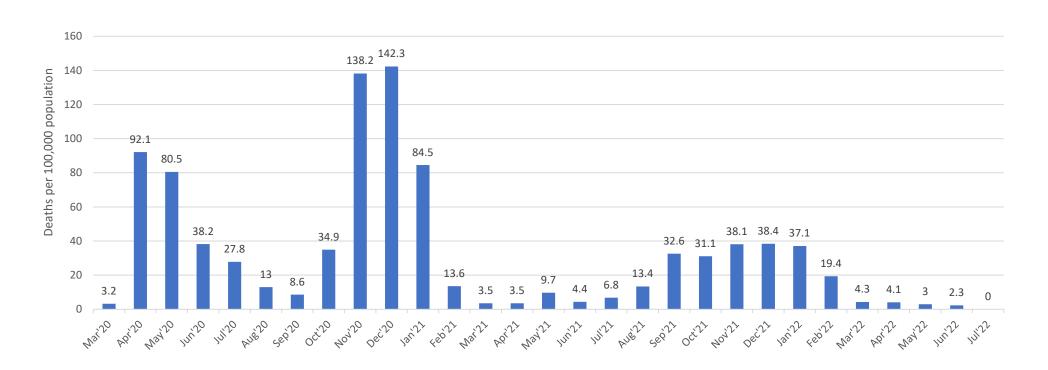

Age-adjusted Mortality Rate per 100,000 Population by Gender

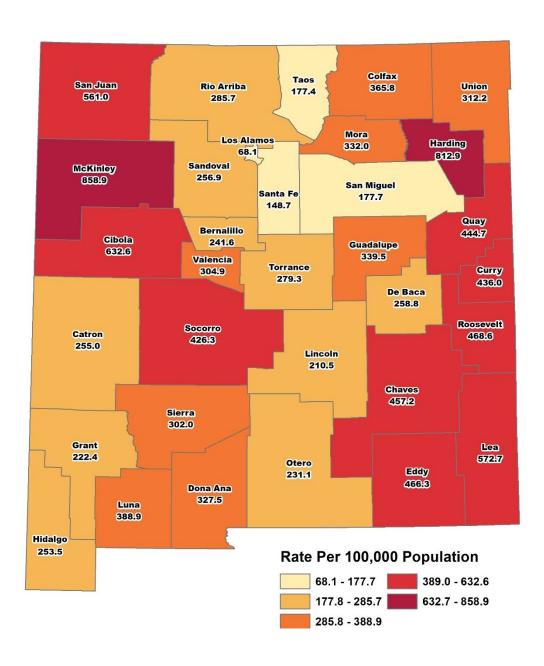

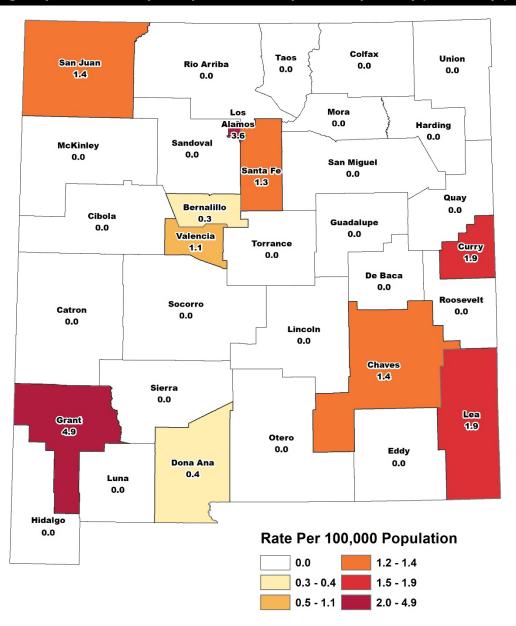

Age-adjusted Mortality rate among AI/AN by Month of 1st Positive Test

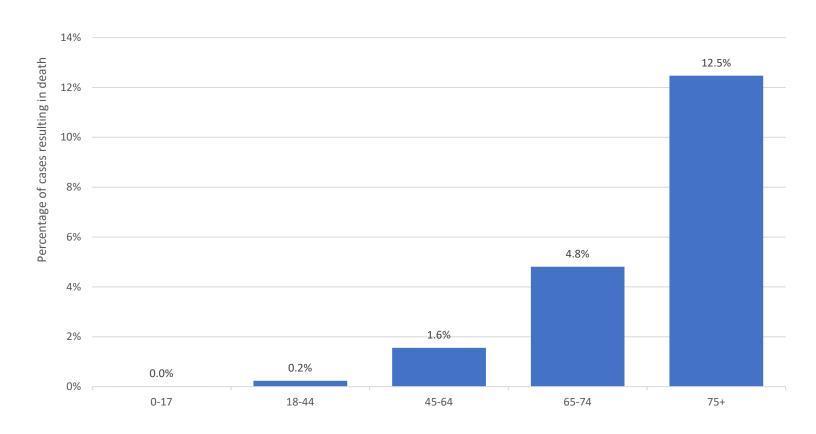

Age-adjusted Mortality Rate per 100,000 Population by County (last 14 days)

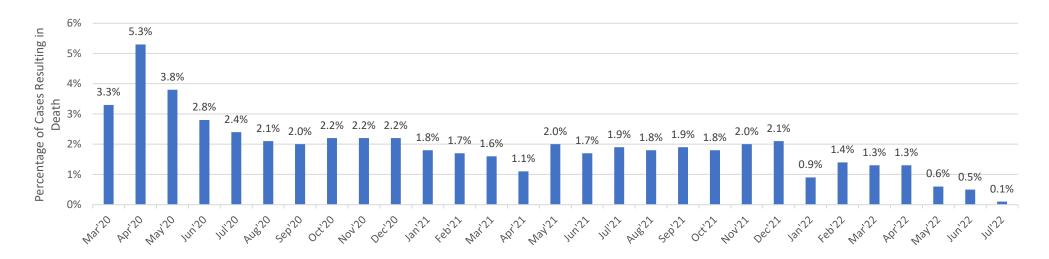

SECTION 3: CASE FATALITY RATES

Case Fatality Rate by Age Group

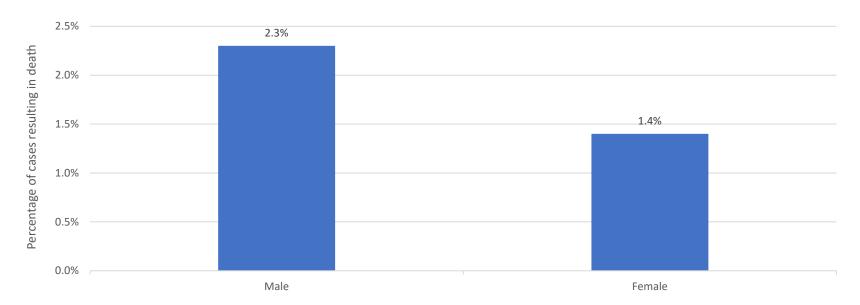

Age-adjusted* Case Fatality Case Fatality Rate by Month of 1st Positive Test

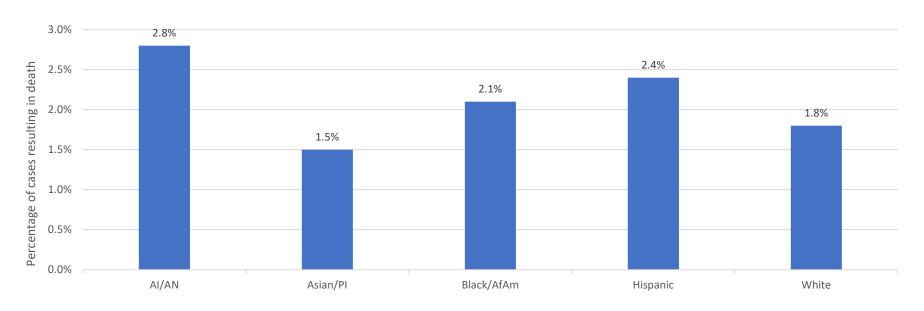

^{*}Age-adjusted case fatality rates are adjusted to the current distribution of U.S. COVID-19 cases. https://covid.cdc.gov/covid-data-tracker/#demographics

Age-adjusted* Case Fatality Rate by Gender

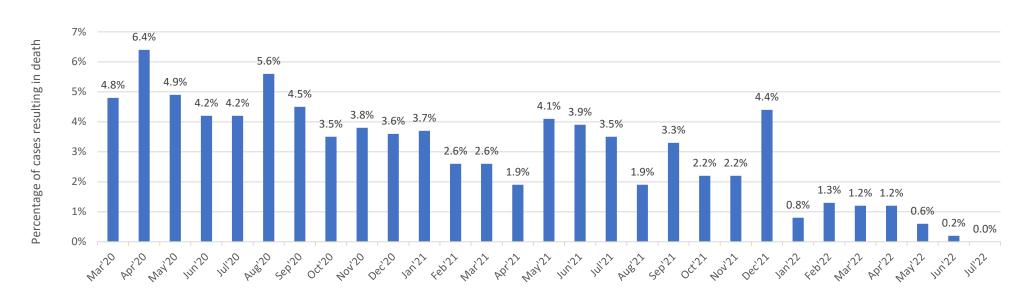

^{*}Age-adjusted case fatality rates are adjusted to the current distribution of U.S. COVID-19 cases. https://covid.cdc.gov/covid-data-tracker/#demographics

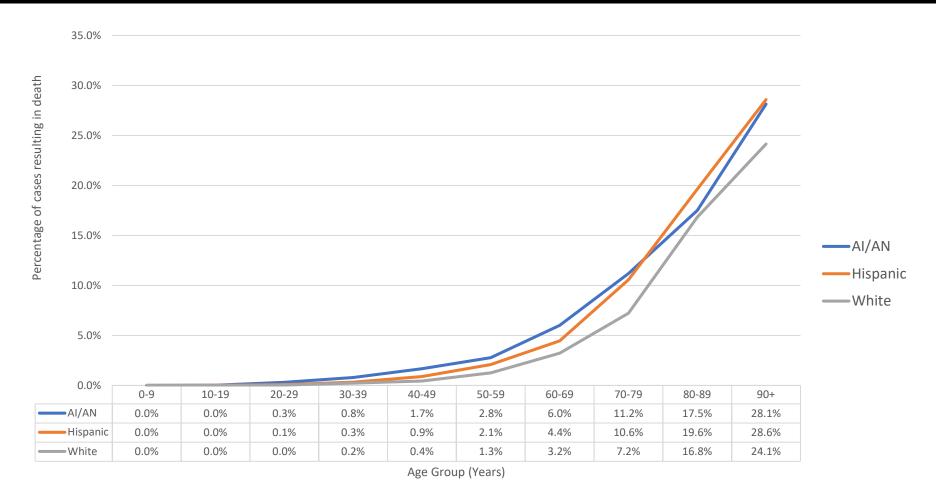

Age-adjusted* Case Fatality Rate by Race/Ethnicity

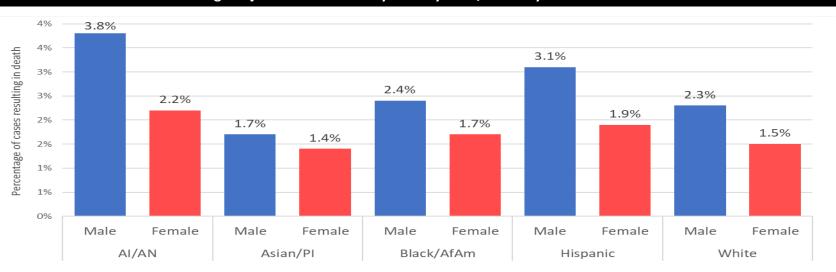

Age-adjusted* Case Fatality Rate Among Al/AN, by Month of 1st Positive Test

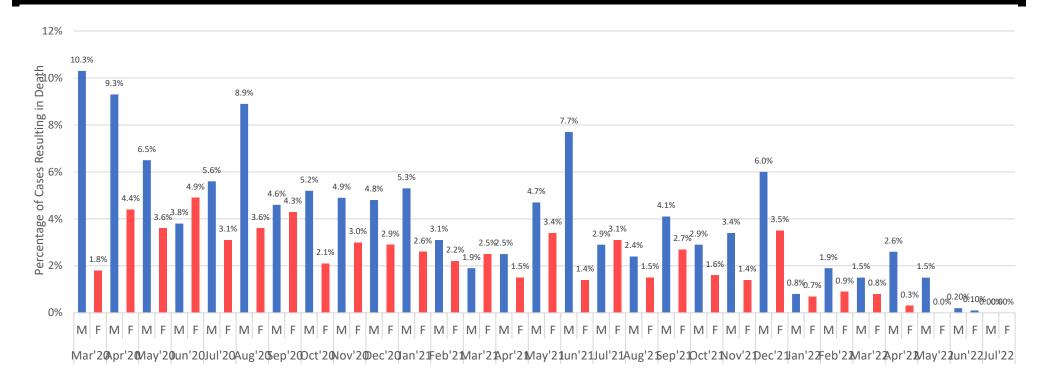

Case Fatality Rate by Race/Ethnicity and Age Group

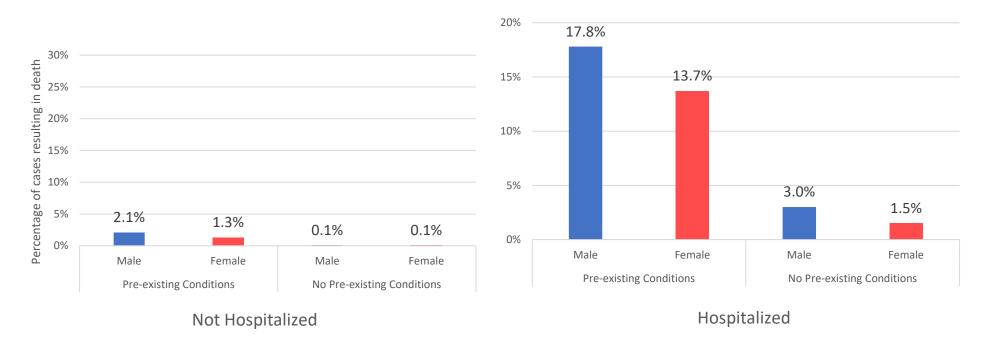

Age-adjusted* Case Fatality Rate by Race/Ethnicity and Gender

Age-adjusted* Case Fatality Rate Among AI/AN, by Month of 1st Positive Test and Gender

Age-adjusted* Case Fatality Rate by Gender, Underlying Conditions, and Hospitalization Status

^{*}Age-adjusted case fatality rates are adjusted to the current distribution of U.S. COVID-19 cases. $\underline{https://covid.cdc.gov/covid-data-tracker/\#demographics}$

Data Sources

- **COVID-19 data:** New Mexico Electronic Disease Surveillance System (NM-EDSS), Infectious Disease Epidemiology Bureau, Epidemiology and Response Division, New Mexico Department of Health.
- Mortality data: Bureau of Vital Records and Health Statistics, Epidemiology and Response Division, New Mexico Department of Health.
- Population Estimates: University of New Mexico, Geospatial and Population Studies (GPS) Program.
- Age-adjustment: US 2000 Standard Population Weights for mortality rates. US COVID-19 cases for case fatality rates.

Data Notes

- The data reported in this weekly update may not match the daily numbers that are reported in the New Mexico Department of Health (NMDOH)
 press releases and/or the NMDOH COVID-19 data dashboard. This may be due to variation in the date and time of data extraction from NM-EDSS,
 corrections after quality assurance review, and differences in the exclusion criteria.
- New Mexico Electronic Disease Surveillance System (NM-EDSS). Disease incidence data are derived from reports of notifiable infectious diseases. NMDOH relies on health care providers, laboratories, hospitals, clinics, institutions and individuals to report suspected and confirmed notifiable infectious diseases in accordance with New Mexico Administrative Code 7.4.3.13. Under-reporting can occur due to of lack of awareness about reporting requirements or lack of compliance with those requirements. Not all cases of infectious diseases can be detected for various reasons including lack of access to health care services, lack of laboratory testing or concerns about confidentiality. Specific and standardized national case definitions are used to classify disease reports by case status.
- New Mexico COVID-19 Related Deaths. Following the standardized surveillance case definition published by the Council of State and Territorial Epidemiologists, COVID-19 related deaths in NM include 1) deaths of confirmed cases, which have a documented positive RT-PCR test or rapid test for SARS-CoV-2; and 2) deaths based on vital records criteria in the absence of confirmatory laboratory evidence, which is a death certificate that lists COVID-19 disease or SARS-CoV-2 as a cause of death or a significant condition contributing to death. Death certificates may list multiple causes of death, with one single cause identified as the underlying cause of death defined as the condition that began the chain of events that ultimately led to the person's death. Death certificates may also list significant conditions contributing to death, defined as a condition or circumstance that contributed to the cause of death but did not result in the underlying cause nor participated in the causal pathway to the final or immediate cause of death. NM only includes natural deaths and excludes intentional and unintentional injury deaths among confirmed cases. Beginning January 1, 2022 deaths due to natural causes matched to a SARS-CoV-2 positive test result within 30 days of the date of death are included as COVID-19 related deaths even when COVID is not listed on the death certificate. From May 12, 2020 through February 9, 2021 12 COVID-19 deaths were reported publicly following notification of a COVID-related death from a facility to NMDOH before receipt of the death certificate. Because death reporting is based on death

certificates and we did not subsequently receive a death certificate associated with these individuals, we are removing these 12 deaths as of June 13, 2022, from the cumulative death count for COVID-19 deaths in NM.

- **New Mexico Population Estimates.** All population estimates apply to July 1 of 2019. Estimates include decimal fractions. The sum of population subgroup estimates may not exactly equal the overall state population estimate due to rounding error. Population estimates for previous years are occasionally revised as new information becomes available. When publishing trend data, always be sure that your rates for earlier years match current rates on NM-IBIS that have been calculated with the most up-to-date population estimates.
- Race/ethnicity. Race and ethnicity are reported as a single variable, race/ethnicity, according to the selection of the case. Any case who is Hispanic is in the Hispanic category and all other races are non-Hispanic.
- Mortality rate per 100,000 population. A basic measure of disease-specific hospitalization frequency is a rate, which takes into account the number of deaths and the population size. It is helpful in making public health decisions for a given population, relative to another population regardless of size.
- Age-adjusted mortality or case fatality rate per 100,000 population. The age-distribution of a population (the number of people in particular age categories) can change over time and can be different in different geographic areas. The use of age-adjusted rates permits a valid comparison among populations. It ensures that the differences in deaths from one population to another are not due to differences in the age distribution of the populations being compared.
- Adjustment to the baseline death count. On 5/24/2021, NMDOH released the results of an audit of COVID-19 related deaths. The net result was the addition of 113 deaths based on death certification which included COVID-19 as cause of death.
