

NEW MEXICO COVID-19 CASES UPDATE

STATEWIDE AND COUNTY-LEVEL TRENDS

September 05, 2022

Unless stated otherwise, all data reported here exclude cases who are from out-of-state and cases who are detainees in Federal Immigration and Customs Enforcement (ICE) facilities.

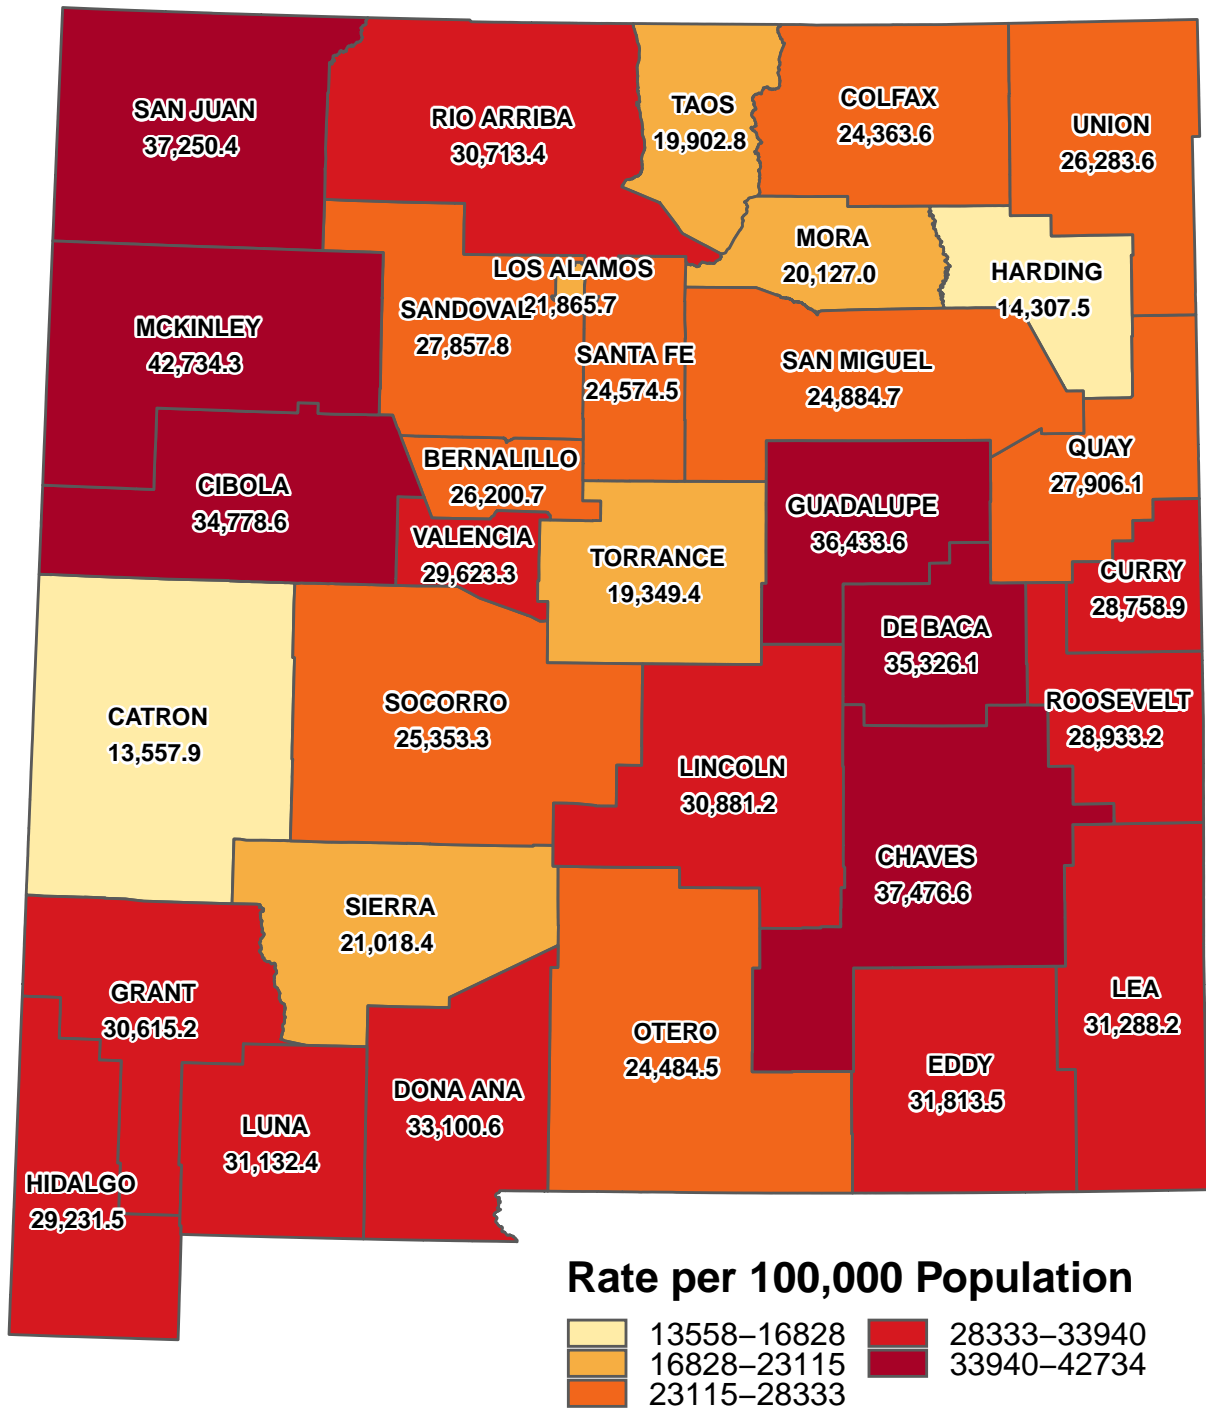

Total Cases	Cases in the Last 7 Days
611,754 ¹	2407

SECTION 1: STATEWIDE AND COUNTY-LEVEL CASES

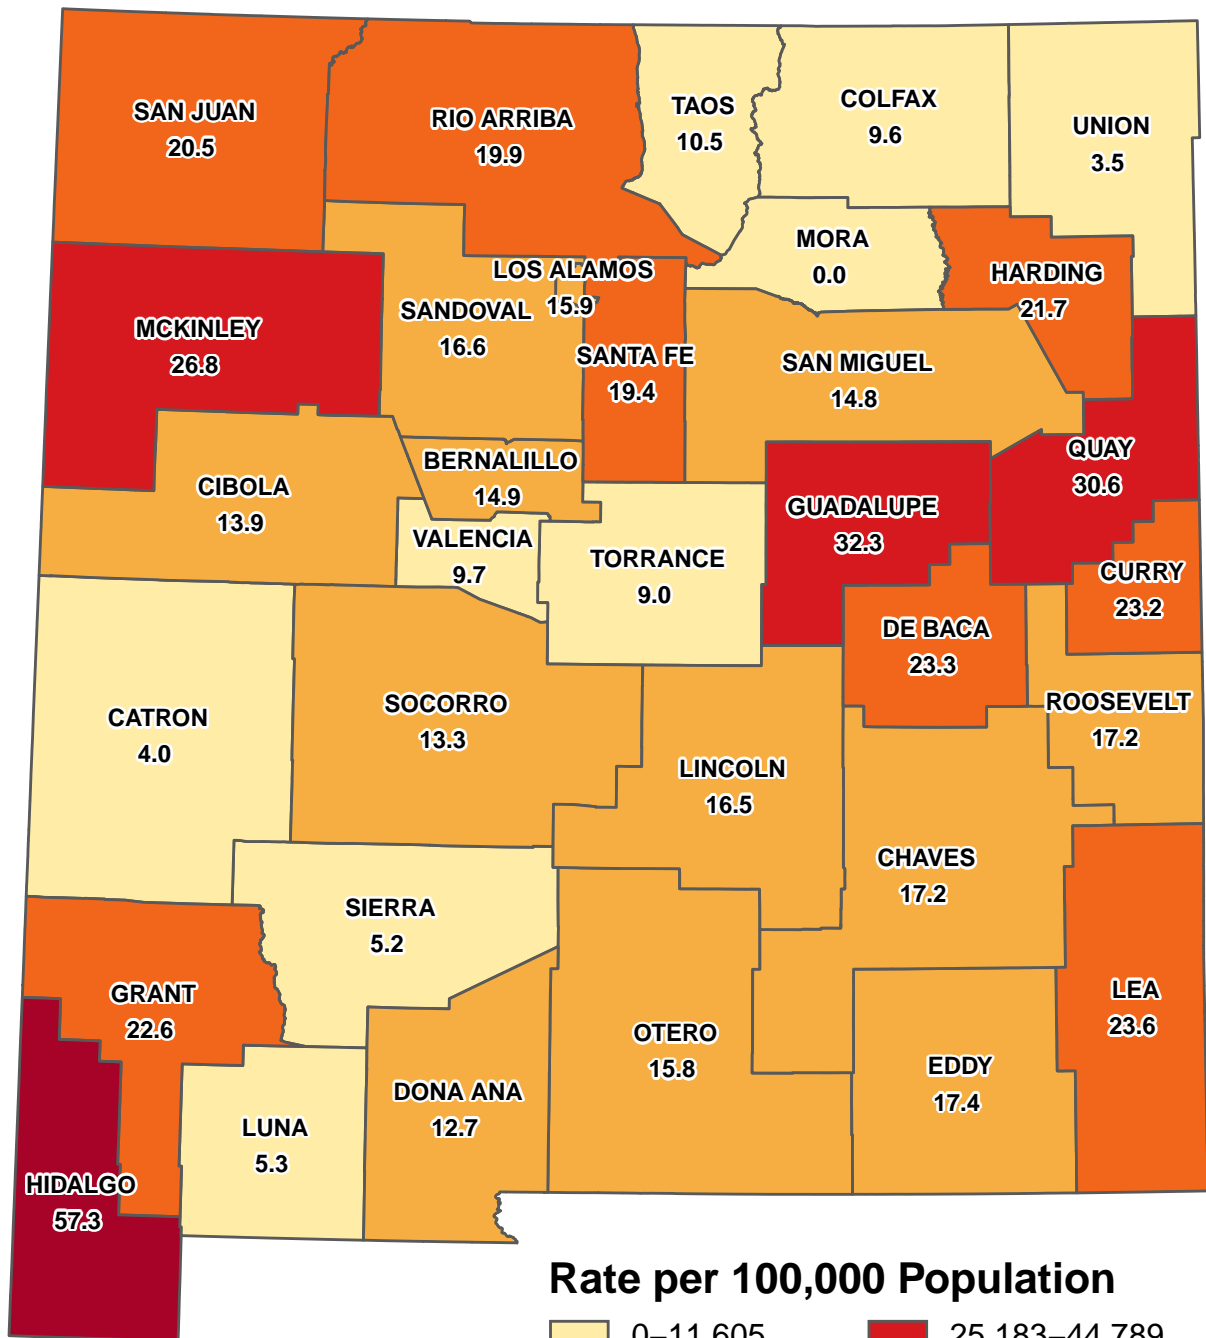

New Mexico cases by date of specimen collection with 7 day moving average

Cumulative case rate per 100,000 population by New Mexico County

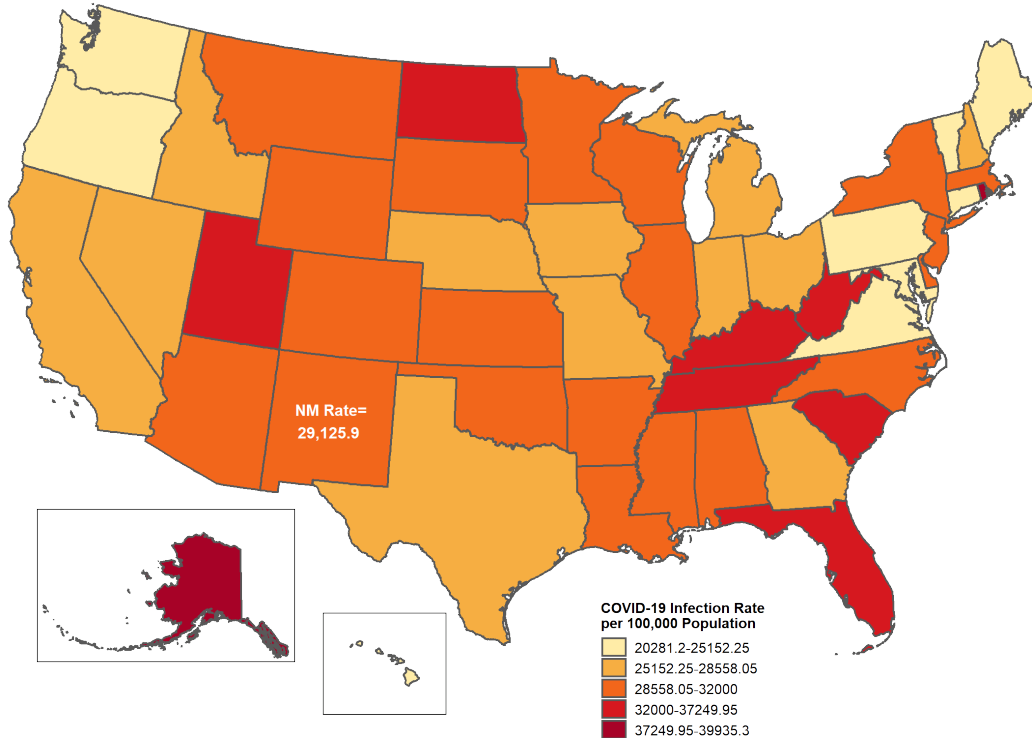

**Average daily case rate per 100,000 population in the previous 7 days by New Mexico County
(08/29/2022 - 09/04/2022)**

County	Rate per 100,000 Population
SAN JUAN	20.5
RIO ARRIBA	19.9
TAOS	10.5
COLFAX	9.6
UNION	3.5
MCKINLEY	26.8
LOS ALAMOS	15.9
SANDOVAL	16.6
MORA	0.0
HARDING	21.7
SANTA FE	19.4
SAN MIGUEL	14.8
CIBOLA	13.9
BERNALILLO	14.9
VALENCIA	9.7
TORRANCE	9.0
GUADALUPE	32.3
QUAY	30.6
CATRON	4.0
SOCORRO	13.3
DE BACA	23.3
CURRY	23.2
ROOSEVELT	17.2
LINCOLN	16.5
CHAVES	17.2
GRANT	22.6
SIERRA	5.2
OTERO	15.8
LEA	23.6
LUNA	5.3
DONA ANA	12.7
EDDY	17.4
HIDALGO	57.3

Cumulative infection rate per 100,000 population by U.S. States

Note: Data updated 09/06/2022 and downloaded from <https://coronavirus.jhu.edu/>. For U.S. interstate comparisons, the methodology used here is slightly different than methodologies used in other NMDOH COVID-19 reports.

Percentage of all emergency department (ED) visits that were Coronavirus-like illness (CLI) and Influenza-like illness (ILI) related

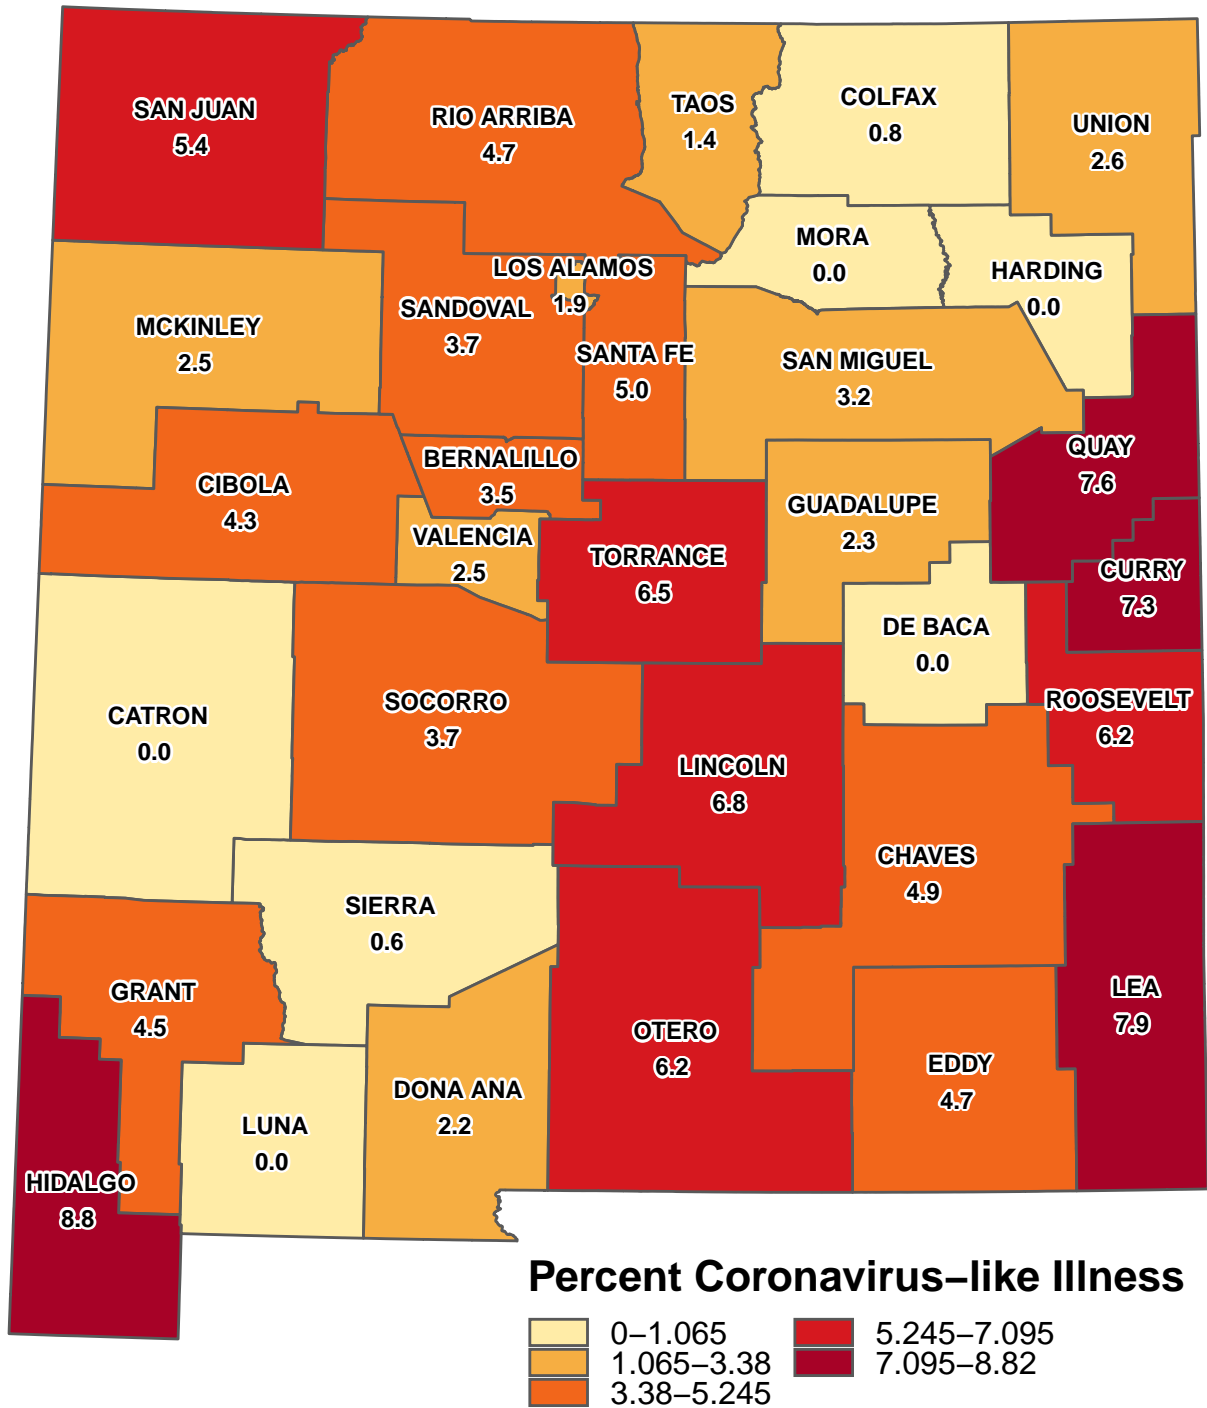

These visualizations are populated from data in New Mexico's Syndromic Surveillance Database. Initial patient encounter information is usually received within 24 hours, but clinical documentation is continuously being updated as it is identified throughout the patient encounter and hospital coding process.

CLI CC with CLI DD and Coronavirus DD includes ED encounters with chief complaint consisting of fever and cough, shortness of breath, or difficulty breathing, while also including COVID-19 associated discharge diagnoses codes. The CLI definition excludes known influenza related ED visits coded with related influenza discharge diagnosis.

ILI CCDD includes ED encounters with chief complaint consisting of fever and cough, while also including ILI and influenza related discharge diagnoses.

Percentage of all emergency department (ED) visits that were for Coronavirus-like illness (CLI) by New Mexico County (08/23/2022 - 09/06/2022)

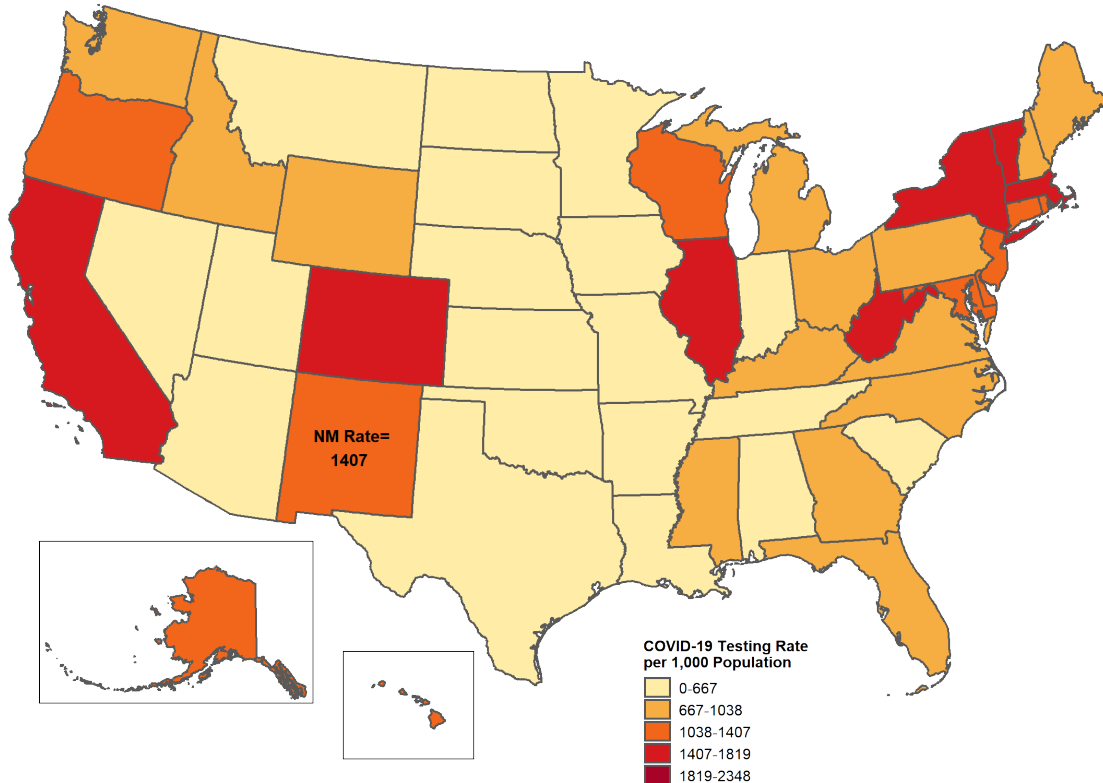

Cumulative number of cases and recovered cases by county

County	Cumulative Cases	Cumulative Recovered
Bernalillo	177825	171677
Catron	479	448
Chaves	23626	22569
Cibola	8465	8113
Colfax	2616	2525
Curry	14326	13775
De Baca	650	631
Dona Ana	72082	69728
Eddy	18513	17864
Grant	8521	8122
Guadalupe	1235	1185
Harding	93	88
Hidalgo	1232	1188
Lea	21457	20373
Lincoln	6130	5905
Los Alamos	4118	3985
Luna	7607	7337
McKinley	30014	28519
Mora	919	889
Otero	15324	14655
Quay	2336	2207
Rio Arriba	11876	11508
Roosevelt	5757	5449
San Juan	46933	45160
San Miguel	6950	6759
Sandoval	40734	39365
Santa Fe	36418	35217
Sierra	2328	2229
Socorro	4358	4154
Taos	6459	6252
Torrance	3049	2918
Union	856	832
Valencia	21843	21018

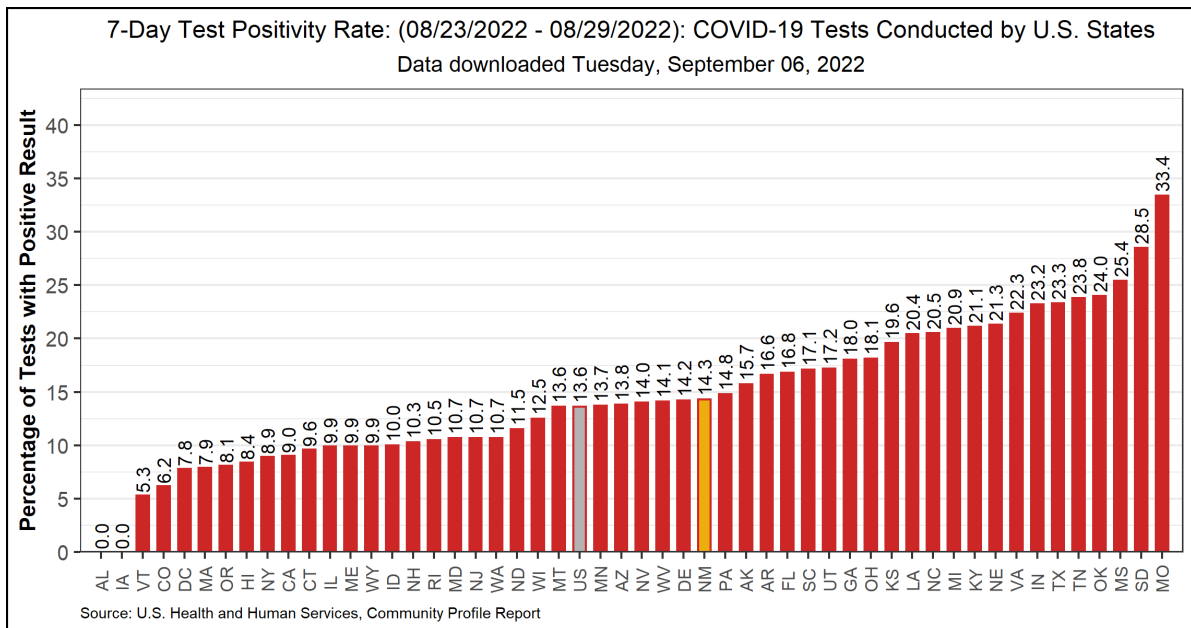

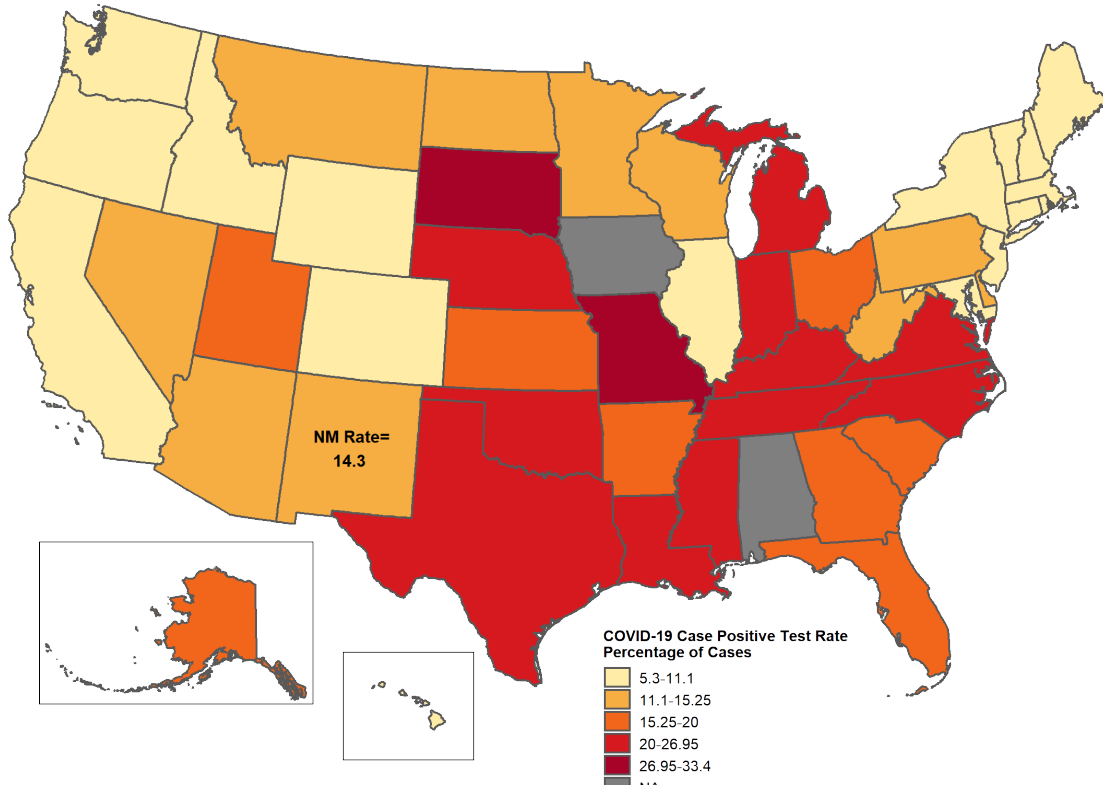

SECTION 2: TESTING

Testing rate by U.S. States

Note: Data downloaded 09/06/2022 and downloaded from <https://beta.healthdata.gov/National/COVID-19-Community-Profile-Report/gqxm-d9w9>. For U.S. interstate comparisons, the methodology used here is slightly different than methodologies used in other NMDOH COVID-19 reports.

Test positivity by U.S. States

Note: Data downloaded 09/06/2022 and downloaded from <https://beta.healthdata.gov/National/COVID-19-Community-Profile-Report/gqxm-d9w9>. For U.S. interstate comparisons, the methodology used here is slightly different than methodologies used in other NMDOH COVID-19 reports. States colored gray in the map are missing data this week.

Data Sources

- **COVID-19 data:**
- **New Mexico Electronic Disease Surveillance System (NM-EDSS)**, Infectious Disease Epidemiology Bureau, Epidemiology and Response Division, New Mexico Department of Health.
- **Salesforce/MTX COVID-19 Case Investigation Platform.**
- **Population Estimates:** University of New Mexico, Geospatial and Population Studies (GPS) Program.
- **Age-adjustment:** US 2000 Standard Population Weights

Data Notes

- **The data reported in this weekly update may not match the daily numbers that are reported in the New Mexico Department of Health (NMDOH) press releases and/or the NMDOH COVID-19 data dashboard. This may be due to variation in the date and time of data extraction from NM-EDSS, corrections after quality assurance review, and differences in the exclusion criteria.**
- **New Mexico Electronic Disease Surveillance System (NM-EDSS).** Disease incidence data are derived from reports of notifiable infectious diseases. NMDOH relies on health care providers, laboratories, hospitals, clinics, institutions and individuals to report suspected and confirmed notifiable infectious diseases in accordance with New Mexico Administrative Code 7.4.3.13. Under-reporting can occur due to lack of awareness about reporting requirements or lack of compliance with those requirements. Not all cases of infectious diseases can be detected for various reasons including lack of access to health care services, lack of laboratory testing or concerns about confidentiality. Specific and standardized national case definitions are used to classify disease reports by case status.
- **New Mexico Population Estimates.** All population estimates apply to July 1 of 2019. Estimates include decimal fractions. The sum of population subgroup estimates may not exactly equal the overall state population estimate due to rounding error. Population estimates for previous years are occasionally revised as new information becomes available. When publishing trend data, always be sure that your rates for earlier years match current rates on NM-IBIS that have been calculated with the most up-to-date population estimates.
- **Race/Ethnicity.** Race/Ethnicity are reported as a single variable according to the selection of the case. Any case who is Hispanic is in the Hispanic category and all other races are non-Hispanic.
- **Gender** refers to a person's internal sense of being male, female, some combination of male and female, or neither male nor female. **Sex** refers to the biological anatomy of an individual's reproductive system, and secondary sex characteristics.
- **Case rate per 100,000 population.** A basic measure of disease-specific case frequency is a rate, which takes into account the number of cases and the population size. It is helpful in making public health decisions for a given population, relative to another population regardless of size.
- **Age-adjusted case rate per 100,000 population.** The age-distribution of a population (the number of people in particular age categories) can change over time and can be different in different geographic areas. The use of age-adjusted rates permits a valid comparison among populations. It ensures that the differences in cases from one population to another are not due to differences in the age distribution of the populations being compared.
