

New Mexico COVID-19 Vaccination Report

October 17, 2023

Vaccination is the most powerful tool available today for preventing infection and severe illness and death due to COVID-19. In this report, we display vaccination status over time and by age, gender, race/ethnicity, county in New Mexico.

The vaccine data comes from 2 data sources: NMSIIS (New Mexico Statewide Immunization Information System) and Tiberius (data from federal agency). The Tiberius collected data from federal agencies include IHS (Indian Health Service), Veterans Administration and Department of Defense.

Vaccines administered includes all COVID-19 vaccinations administered from the start of the pandemic through Sunday prior to the report.

Primary series includes those who have completed a primary vaccination series consisting of 2 doses of the Pfizer (3-doses of Pfizer vaccine for those aged 6 months to 4 years), Moderna or Novavax vaccine, or a single dose of the Johnson & Johnson vaccine. Some may have had an additional or booster vaccine as well.

Bivalent vaccine includes those who have received an updated Pfizer or Moderna bivalent vaccine. % received bivalent vaccine is the percentage of the New Mexico population ages 6 months and older who have received a bivalent vaccine.

On May 12, 2023, CDC updated the guideline of the COVID-19 vaccine. Everyone aged 6 years and older should get one updated Pfizer-BioNTech or Moderna COVID-19 vaccine to be up to date.

People aged 65 years and older may get a second dose of updated Pfizer-BioNTech or Moderna COVID-19 vaccine.

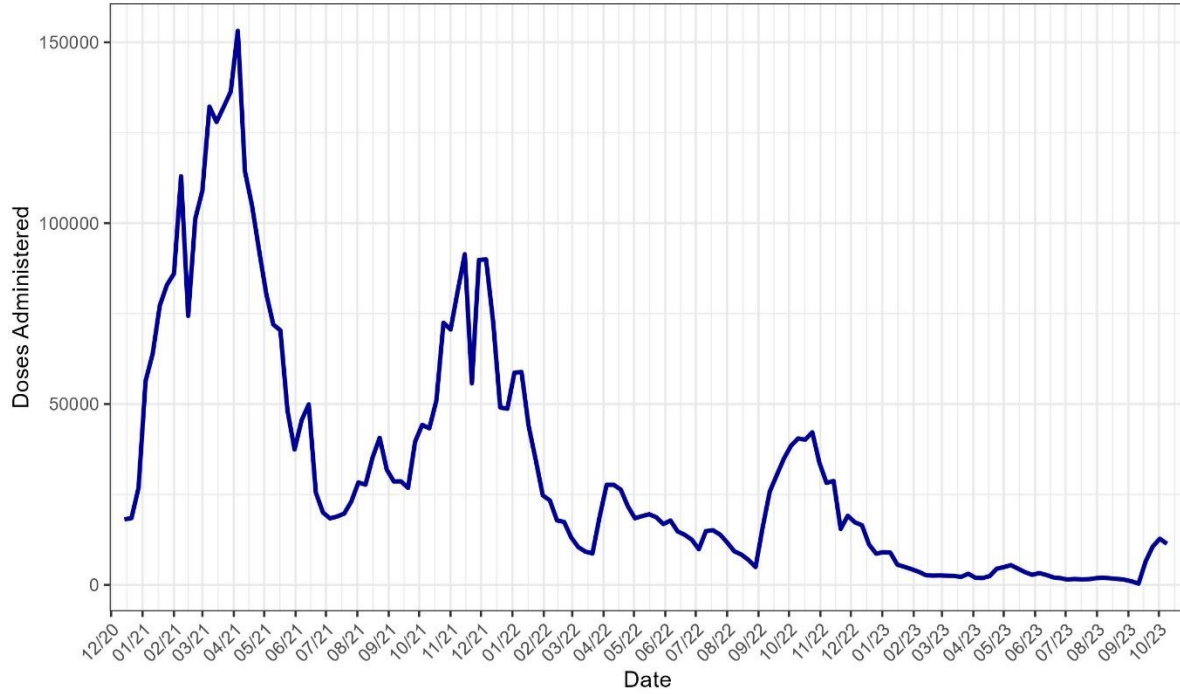

People who are moderately or severely immunocompromised may get additional doses of updated Pfizer-BioNTech or Moderna COVID-19 vaccine.

Children aged 6 months to 5 years may need multiple doses of COVID-19 vaccine to be up to date, including at least one dose of updated Pfizer-BioNTech or Moderna COVID-19 vaccine, depending on the number of doses they've previously received and their age.

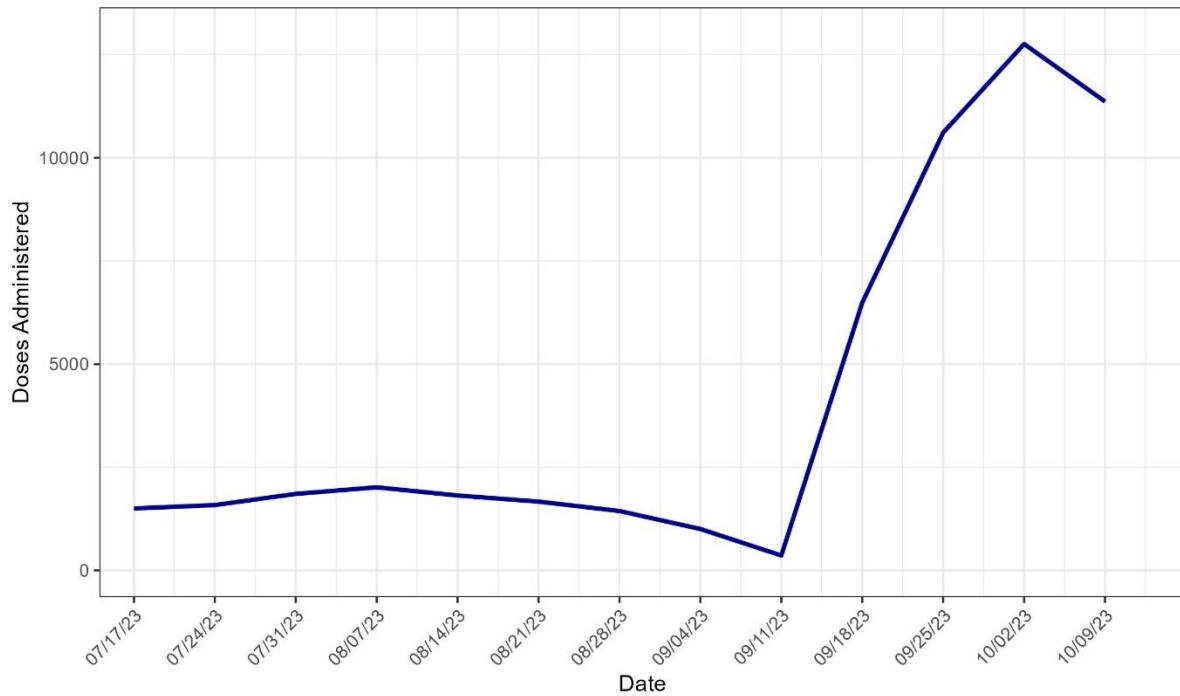

On September 11, 2023, the FDA approval and CDC recommendations apply to the mRNA vaccines from Pfizer-BioNTech and Moderna. The 2023-2024 updated vaccine is based on a variant is a monovalent vaccine. Everyone aged 6 months and older should get 1 dose of the updated vaccine.

Weekly Covid-19 Vaccines Administered, 14Dec2020 - 15Oct2023

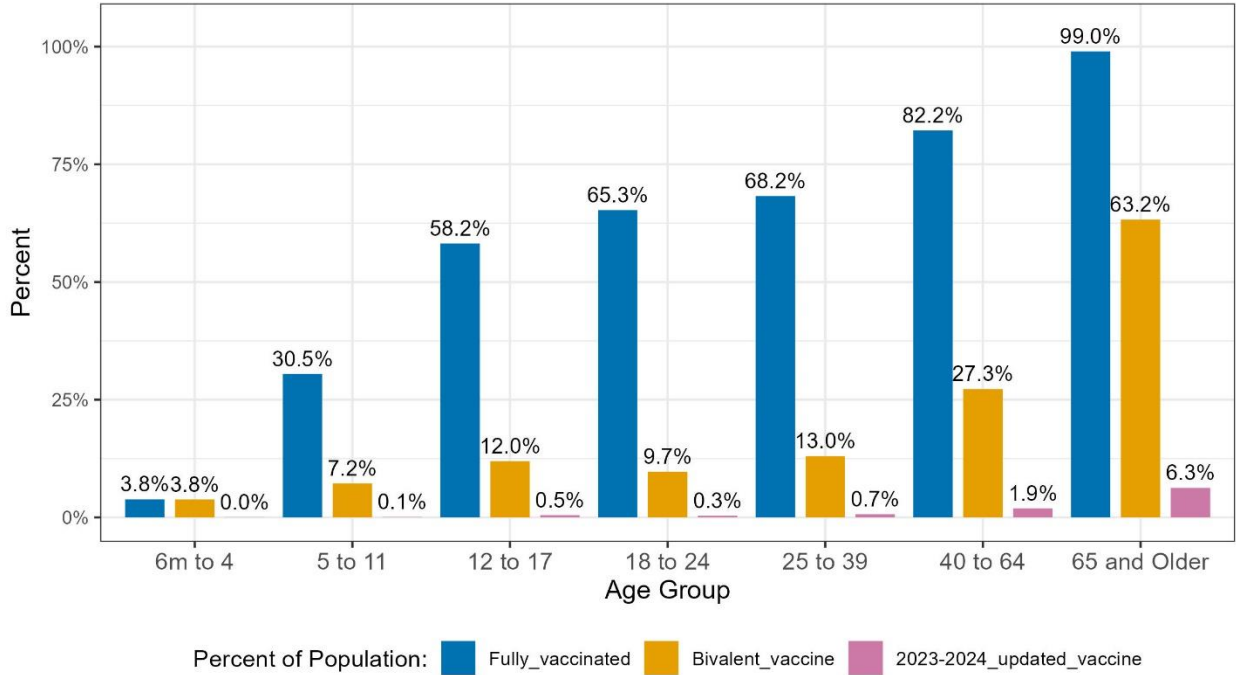

Weekly Covid-19 Vaccines Administered in Last 3 months, 15Jul2023 - 15Oct2023

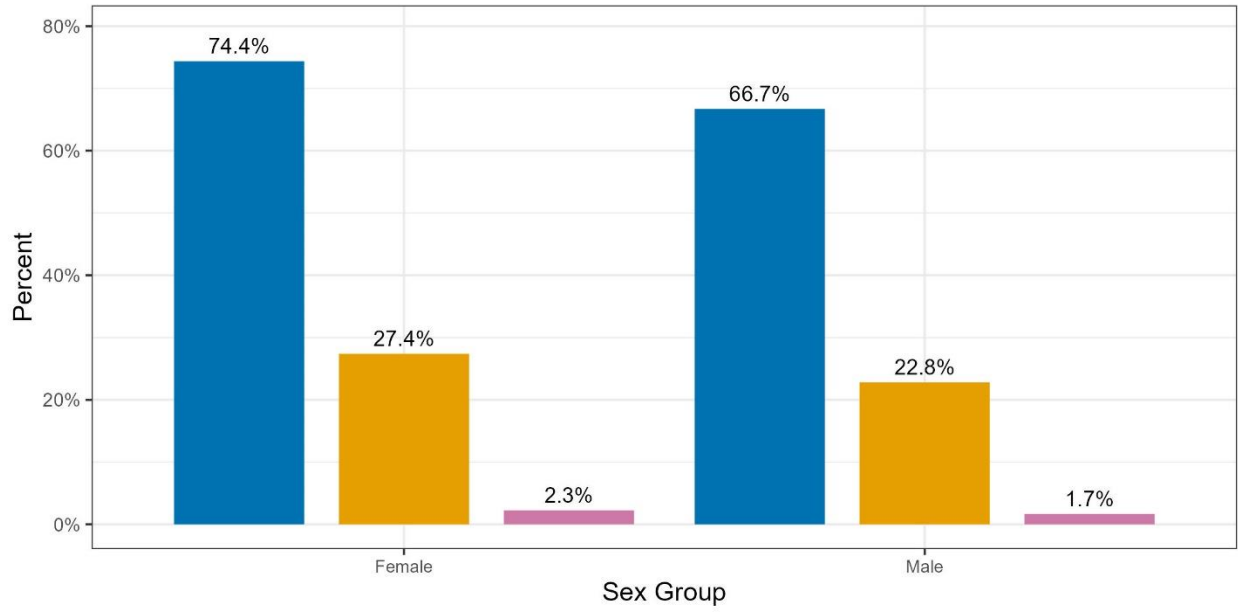

Vaccination Administered by Age, 14Dec2020 - 15Oct2023

The denominator is New Mexico resident population 6-month and older.

Vaccination Administered by Sex, 14Dec2020 - 15Oct2023

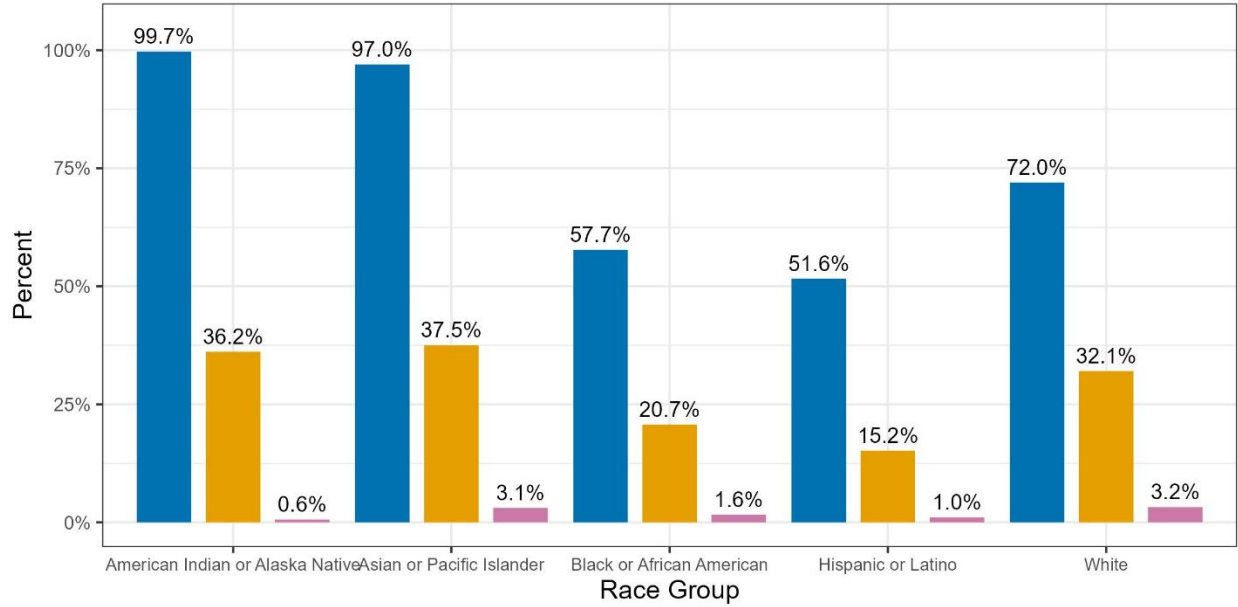

Percent of Population: Fully_vaccinated Bivalent_vaccine 2023-2024_updated_vaccine

The denominator is New Mexico resident population 6-month and older.

Vaccination Administered by Race, 14Dec2020 - 15Oct2023

Percent of Population: Fully_vaccinated Bivalent_vaccine 2023-2024_updated_vaccine

The denominator is New Mexico resident population 6-month and older.

% of individuals that have 2023-2024 updated vaccine by County (6 m+)
