

New Mexico COVID-19 Vaccination Report December 19, 2023

Vaccination is the most powerful tool available today for preventing infection and severe illness and death due to COVID-19. In this report, we display vaccination status over time and by age, gender, race/ethnicity, county in New Mexico.

The vaccine data comes from 2 data sources: NMSIS (New Mexico Statewide Immunization Information System) and Tiberius (data from federal agency). The Tiberius collected data from federal agencies include IHS (Indian Health Service), Veterans Administration and Department of Defense.

Vaccines administered in this report includes all COVID-19 vaccinations administered from the start of the pandemic through Sunday prior to the report.

Primary series includes those who have completed a primary vaccination series consisting of 2 doses of the Pfizer (3-doses of Pfizer vaccine for those aged 6 months to 4 years), Moderna or Novavax vaccine, or a single dose of the Johnson & Johnson vaccine. Some may have had an additional or booster vaccine as well.

Bivalent vaccine includes those who have received an updated Pfizer or Moderna bivalent vaccine. % received bivalent vaccine is the percentage of the New Mexico population ages 6 months and older who have received a bivalent vaccine.

CDC recommends the 2023–2024 updated COVID-19 vaccines: Pfizer-BioNTech, Moderna, or Novavax, to protect against serious illness from COVID-19. On September 11, 2023, the FDA approval and CDC recommendations apply to the mRNA vaccines from Pfizer-BioNTech and Moderna. On October 3, 2023, the FDA amended the emergency use authorization (EUA) of Novavax COVID-19 Vaccine, Adjuvanted to include the 2023-2024 formula. All the 3 types are monovalent vaccine.

Everyone aged 5 years and older should get 1 dose of an updated COVID-19 vaccine to protect against serious illness from COVID-19. Children aged 6 months–4 years need multiple doses of COVID-19 vaccines to be up to date, including at least 1 dose of updated COVID-19 vaccine. People who are moderately or severely immunocompromised may get additional doses of updated COVID-19 vaccine. COVID-19 vaccine recommendations will be updated as needed.

Weekly Covid-19 Vaccines Administered, 14Dec2020 - 17Dec2023

Weekly Covid-19 Vaccines Administered in Last 3 months, 11Sep2023 - 17Dec2023

Vaccination Administered by Age, 14Dec2020 - 17Dec2023

The denominator is New Mexico resident population 6-month and older.

Vaccination Administered by Sex, 14Dec2020 - 17Dec2023

Percent of Population: Fully_vaccinated Bivalent_vaccine 23-24_update_vax

The denominator is New Mexico resident population 6-month and older.

Vaccination Administered by Race, 14Dec2020 - 17Dec2023

Percent of Population: Fully_vaccinated Bivalent_vaccine 23-24_update_vax

The denominator is New Mexico resident population 6-month and older.

% of individuals that have 2023-2024 updated vaccine by County (6 m+)
